Surgical Forum XLVIII

Chapter I—Metabolism and Nutrition

Sepsis Is Associated with Increased Expression of the 14-kd Ubiquitin-Conjugating Enzyme (E2) in Skeletal Muscle.....1
Scott Hobler, MD, Jing Jing Wang, MD, Josef E. Fischer, MD, FACS, and Per-Olof Hasselgren, MD, FACS

Accelerated Hepatic Arginine Transport in the Burned Rat Is Mediated by Tumor Necrosis Factor and Involves Induction of Two Distinct Plasma Membrane Carriers.....3
Rudiger Lohmann, MD, Barrie P. Bode, PhD, and Wiley W. Souba, MD, ScD, FACS

Cellular and Molecular Mechanisms of Insulin Resistance in Adipose Cells from Tumor-Bearing Rats 7
Takaki Yoshikawa, MD, PhD, Yoshikazu Noguchi, MD, FACS, Shinobu Satoh, MD, PhD, Chiharu Doi, MD, and Akihiko Matsumoto, MD, PhD

Differential Responses of Diabetic Resistance Arteries to Endothelium-Dependent Vasodilators Suggest Defective Endothelial Membrane Receptor–G Proteins Complex 9
Stewart P. Wang, MD, Lisa S. Dresner, MD, Ihor N. Ponomarenko, MD, Michael W. West, MD, Cathy M. Mueller, BS, and Richard B. Wait, MD, PhD, FACS

Intraventromedial Hypothalamic Nucleus Sepsis-Related IL-1α Causes Anorexia via 5-HT and Dopamine 11
Zhong-Jin Yang, MD, Vladimir Blaha, MD, Michael Meguid, MD, PhD, FACS, Albert Oler, MD, PhD, and Zdenek Zadak, MD

Fentanyl Citrate Blocks Metabolic Responses Due to a Reduction of Endogenous Morphine Levels in the Brain 14
Yuichiro Shirouzu, MD, Shogo Yoshida, MD, PhD, Tsukasa Yoshizumi, MD, Atsushi Kaibara, MD, PhD, Kokushi Ymasaki, MD, PhD, and Kazuo Shirouzu, MD, PhD

Insulin Treatment Normalizes Impaired Endothelium-Dependent Relaxation to Acetylcholine in Diabetic Rat Resistance Arteries 16
Ihor N. Ponomarenko, MD, Lisa S. Dresner, MD, Stewart P. Wang, MD, Charles Choy, BS, Cathy M. Mueller, BS, Zaria C. Hunt, MD, and Richard B. Wait, MD, PhD, FACS

Nutritional Modulation of Glutamine Synthetase Expression in Stressed Rats 19
Brian I. Labow, MD, Steve F. Abcouwer, PhD, and Wiley W. Souba, MD, ScD, FACS

Glutamine Improves Function but Does Not Prevent Mucosal Injury After Ischemia/Reperfusion of Rat Small Intestine 22
Benjamin W. Starnes, MD, Houman Tavaf-Motamen, MD, Thomas Miner, MD, and Terez Shea-Donohue, PhD

Vitamin E Enhances Atherosclerosis Regression in the Diet-Induced Hypercholesterolemic Rabbit Model 24
Andrew J. Matthews, MD, Hector J. Menchaca, MD, Van N. Michalek, BA, Jozef Murar, MD, Gregory M. Vercellotti, MD, and Henry Buchwald, MD, PhD, FACS

Continuous Butyrate Infusion into the Hepatic Artery Inhibits Growth of Colorectal Hepatic Metastases in a Murine Model 26
James O. Park, BS, Emma D. Zhou, MS, Omaida C. Velazquez, MD, and John L. Rombeau, MD, FACS

Activation of Intracellular Protein Breakdown in Skeletal Muscle by Nitric Oxide and Oxygen Free Radicals 30
Nicholas E. Tawa, Jr., MD, PhD, FACS, and Matthew S. Warren, BS

Chapter II—Cell Signaling

Role of the Mitogen-Activated Protein Kinases in Neutrophil Activation and Apoptosis 33
Maria F. Jimenez, MD, Ian McGilvray, MD, R. William G. Watson, PhD, Ziyue Lu, MD, John C. Marshall, MD, FRCSC, FACS, and Ori D. Rotstein, MD, FRCSC, FACS

Endotoxin-Induced Inhibition of Neutrophil Apoptosis Is Reversed Through Blockade of the Tyrosine Pathway by Interleukin-10 35
Wolfgang Ertel, MD, Marius Keel, MD, Udo Ungethuem, MS, Ursula Steckholzer, MS, Manfred Birchler, MD, and Otmar Trentz, MD

Serine Protease Activity Is Required for Interleukin-1β-Induced NF-κB Activation in Human Intestinal Epithelial Cells 38
Alexander A. Parikh, MD, M. Ryan Moon, MD, Josef E. Fischer, MD, FACS, Andrew L. Salzman, MD, and Per-Olof Hasselgren, MD, FACS

Rho Is Required for the Initiation of Calcium Transients and Phagocytosis by Fc Receptors in Macrophages 41
David J. Hackam, MD, Ori D. Rotstein, MD, MSc, FACS, Weijian Zhang, MD, PhD, and Sergio Grinstein, PhD

Activation of Stress-Activated Protein Kinase Is a Mechanism of Priming in Macrophages 43
Gregory J. Bauer, MD, Iris Garcia, BS, and Ronald V. Maier, MD, FACS

Tumor Necrosis Factor-α-Mediated Priming of the Respiratory Burst in Neutrophils Proceeds Through the p38 Stress Kinase Pathway 46
Michael B. Yaffe, MD, PhD, Glenn Brown, PhD, Peter A. Burke, MD, FACS, William J. Welch, PhD, and R. Armour Forse, MD, PhD, FACS

Role of p38 MAP Kinase in Human Neutrophil Priming for Superoxide Production and Elastase Release 48
David A. Partrick, MD, Ernest E. Moore, MD, FACS, Charles A. Dinarello, MD, Daniel R. Meldrum, MD, Jeff L. Johnson, MD, Douglas Y. Tamura, MD, and Christopher C. Silliman, MD, PhD

LPS and Inflammatory Cytokines Cause DNA Strand Breaks Through a Cyclic Guanosine Monophosphate-Dependent Mechanism 50
Sean E. McLean, BA, Judy Smith, BS, and Don K. Nakayama, MD, FACS

Macrophage Endotoxin Signal Transduction in Sepsis: Endotoxin Pretreatment Upregulates Nuclear Factor-κB and Inhibits Mitogen-Activated Protein Kinase 53
James Kraatz, MD, Laurel Clair, BS, Jorge L. Rodriguez, MD, FACS, and Michael A. West, MD, PhD, FACS

Prostaglandin E_2 Downregulation of Alveolar Macrophages Occurs at the Posttranscriptional Level 56
Chong-Jeh Lo, MD, Minjuan Fu, BS, F. Rosa Lo, MS, and Gill Cryer, MD, PhD, FACS

Activation of the Fas/Fas Ligand Pathway Induces a Tumor Necrosis Factor-α Response That Attenuates Fas Ligand-Mediated Liver Injury 58
Riadh Ksontini, MD, Cynthia L. Tannahill, BS, Dot B. Colagiovanni, PhD, Carl K. Edwards III, PhD, Zaher Abouhamze, Jean-Nicolas Vauthey, MD, Edward M. Copeland III, MD, Lyle L. Moldawer, PhD, and Sally L. D. MacKay, PhD

Spermine as an Endogenous Inhibitor of Proinflammatory Cytokine Synthesis 60
Minghuang Zhang, MD, Theresa Caragine, BS, Haichao Wang, PhD, Galina Botchkina, MD, Kuniyasu Soda, MD, Barbara Sherry, PhD, and Kevin J. Tracey, MD

Chapter III—Sepsis and Endotoxin

Admission Postburn Serum IL-6 Levels Predict Subsequent Bacteremic Sepsis 63
Katharina Pellegrin, MD, Verlyn M. Peterson, MD, C. Edward Hartford, MD, FACS, Christine H. Rundus, MT, and Xue Wei Wang, MD

A Novel D-Isomer Peptide Inhibits Gram-Negative Bacterial Endotoxin 65
Robert D. Acton, MD, Marc E. Uknis, MD, Hans G. Klaerner, MD, Peter S. Dahlberg, MD, Judith R. Haseman, BS, Beulah H. Gray, PhD, and David L. Dunn, MD, PhD, FACS

Killed Bacterial Preparations Protect Against Live Bacterial Infection Better Than Endotoxin: Tolerance Is Not Unique to Endotoxin 67
Thomas G. Gleason, MD, Robert G. Sawyer, MD, C. Webster Houlgrave, MS, and Timothy L. Pruett, MD

Lipoproteins Can Ameliorate the Effects of Endotoxemia in Humans 70
Hobart W. Harris, MD, MPH

Lipoproteins Inhibit LBP-Dependent Kupffer Cell Endotoxin Responses 72
Brian W. Nolan, MD, James T. Sentementes, BS, and Paul E. Bankey, MD, PhD, FACS

Sepsis-Induced Hepatic Injury Is Mediated by TNFα and Not Fas Ligand 74
Michael D. Josephs, MS, MD, Riadh Ksontini, MD, Carmen C. Solorzano, MD, Armin K. Moshyedi, MD, Eddie K. Abdalla, MD, Dorothy B. Colagiovanni, PhD, Carl K. Edwards III, PhD, Cynthia L. Tannahill, BS, Zaher Abouhamze, Sally L. D. MacKay, PhD, Edward M. Copeland III, MD, FACS, and Lyle L. Moldawer, PhD

Reciprocal Expression of IL-10 and IL-6 in Enterocyte–Immunocyte Coculture 78
Lena M. Napolitano, MD, FACS, Molly M. Buzdon, MD, Hui-Jun Shi, MS, and Barbara L. Bass, MD, FACS

Intestinal Macrophage-Inducible Nitric Oxide Suppresses Circular Smooth Muscle Activity During Endotoxemia 80
Mark K. Eskandari, MD, Jörg C. Kalff, MD, Timothy R. Billiar, MD, FACS, Kenneth K. W. Lee, MD, FACS, and Anthony J. Bauer, PhD

LPS-Induced Gut Injury and Bacterial Translocation Are Not Mediated via an Apoptotic Mechanism and Can Be Prevented by the Induction of a Heat Shock Response 82
Richard Kubicka, MD, Da-Zhong Xu, MD, PhD, Qi Lu, MD, and Edwin A. Deitch, MD, FACS

A Novel Ruthenium-Based Nitric Oxide Scavenger Ameliorates Acute Lung Injury in Porcine Endotoxemia 84
Aaron G. Baggs, MD, Simon Fricker, PhD, Michael Abrams, PhD, Charlie Lee, MD, and Mitchell P. Fink, MD, FACS

Protection Against Nitrogen Loss in Murine Tumor-Associated Cachexia by a Tetravalent Guanylhydrazone (CNI-1493) 86
Marina Bianchi, MD, and Kevin J. Tracey, MD

Endotoxin-Induced Vascular Collapse Derives from K_{ATP} Channel Activation with Resultant Impairment of α_1-Adrenergic Signaling 89
Brett C. Sheridan, MD, David A. Fullerton, MD, FACS, Daniel R. Meldrum, MD, Alden H. Harken, MD, FACS, and Robert C. McIntyre, Jr., MD

Chapter IV—Inflammation

The Profile of T Helper 1/TH2 Responses Post-Major Trauma 92
Caroline Kim, MD, Jean-Pierre Kremer, PhD, Guido Henckel von Donnersmarck, MD, René de Waal Malefyt, PhD, and Eugen Faist, MD, FACS

Gender Differences in Immune Responses: Increased Thymocyte Apoptosis Occurs Only in Males but Not in Females After Trauma-Hemorrhage 95
Martin K. Angele, MD, Ying Xin Xu, MD, Alfred Ayala, PhD, Robert A. Catania, MD, William G. Cioffi, MD, FACS, Kirby I. Bland, MD, FACS, and Irshad H. Chaudry, PhD

Reduced Polymorphonuclear Neutrophil Exudation in Critical Illness Is Due to Regionalization Induced by the Primary Infection 97
Daniel E. Swartz, MD, Andrew J. E. Seely, MD, and Nicolas V. Christou, MD, PhD, FRCSC

Intestinal Ischemia–Reperfusion-Induced Capillary Leakage Is Mediated by Systemic Rather Than Local/Regional Factors 100
Houman Tavaf-Motamen, MD, Thomas Miner, MD, and Terez Shea-Donohue, PhD

Role of L-Selectin in Liver Function and Survival in Rats After Uncontrolled Hemorrhagic Shock 103
Fernando A. Rivera-Chavez, MD, Luis H. Toledo-Pereyra, MD, PhD, FICS, Ben Bachulis, MD, FACS, James M. Harkema, MD, FACS, Juan M. Palma-Vargas, MD, and Richard E. Dean, MD, FACS

Tumor Necrosis Factor Induces the Release of Polymorphonuclear Leukocyte Promatrix Metalloproteinase 9, Which Is Activated by Plasmin but Not by Elastase 105
Jess D. Schwartz, MD, Peter Shamamian, MD, Sara Monea, MS, Lucia Zanetta, MS, Kenneth Eng, MD, FACS, H. Leon Pachter, MD, FACS, Paolo Mignatti, MD, and Aubrey C. Galloway, MD, FACS

Treatment with the iNOS Inhibitor L-N^6-(1-Iminoethyl) Lysine (L-NIL) Attenuates the Inflammatory Response Caused by Resuscitated Hemorrhagic Shock 108
Christian Hierholzer, MD, John Menezes, MD, Jörg C. Kalff, MD, Brian G. Harbrecht, MD, Timothy R. Billiar, MD, and David J. Tweardy, MD

Tumor Necrosis Factorα Increases Pulmonary Vascular Permeability Through a Nitric Oxide-Dependent Mechanism..... 110
Neil K. Worrall, MD, Kathy Chang, PhD, Wanda S. LeJeune, BA, Thomas P. Misko, PhD, Patrick M. Sullivan, MA, Joseph R. Williamson, MD, and T. Bruce Ferguson, Jr., MD, FACS

Nitric Oxide Inhibitors Restore Splenocyte Mitogenesis by Blocking Trauma-Induced Prostaglandin E-2 Production 113
Martin McCarter, MD, Hassan Naama, MD, FRCSI, Jian Shou, MD, Oreste Gentilini, MD, and John M. Daly, MD, FACS

The Role of Inducible Nitric Oxide Synthase in Hepatic Injury and Heme Oxygenase-1 Expression Following Intestinal Ischemia/Reperfusion 116
John M. Kane III, MD, Andrew B. Peitzman, MD, FACS, and Timothy R. Billiar, MD, FACS

Endothelin Antagonism Reduces the Systemic Inflammatory Response in a Murine Model of Intestinal Ischemia/Reperfusion.. 119
John S. Lane, MD, Karen E. Todd, MD, David A. Rigberg, MD, Beat Gloor, MD, Andrew Kau, BS, Stanley W. Ashley, MD, FACS, David W. McFadden, MD, FACS, Howard A. Reber, MD, FACS, and Charles F. Chandler, MD

Factors Responsible for Producing the Transition from the Hyperdynamic to Hypodynamic Stage of Sepsis: Role of a Novel Vasodilatory Peptide, Adrenomedullin 122
Ping Wang, MD, Zheng F. Ba, BS, William G. Cioffi, MD, FACS, and Irshad H. Chaudry, PhD

Chapter V—Resuscitation and Care

What Constitutes Better Resuscitation Following Trauma and Hemorrhage? Rapid or Slower Rate of Fluid Administration 125
Nadia Smail, MD, Ping Wang, MD, William G. Cioffi, MD, FACS, Kirby I. Bland, MD, FACS, and Irshad H. Chaudry, PhD

Conditioning to Hemorrhagic Shock Improves Survival and Attenuates Inflammatory Cytokine Gene Induction in the Lung, Liver, and Spleen of Rats 127
Emmanuel E. Zervos, MD, Mark Bloomston, MD, Larry C. Carey, MD, Carl Salhab, BS, and Alexander S. Rosemurgy, MD

Hypertonic Saline Resuscitation Attenuates Neutrophil Sequestration in the Lung Following Hemorrhagic Shock 129
Sandro Rizoli, MD, Ivana Soric, BSc, R. William G. Watson, PhD, Maria Jimenez, MD, Ian McGilvray, MD, Andras Kapus, PhD, MD, and Ori Rotstein, MD, FRCSC

Hemmorrhage Primes Alveolar Macrophages for Enhanced CINC-Like Chemoattractant Release Irrespective of Type of Resuscitation Fluid 132
Niren Angle, MD, David B. Hoyt, MD, FACS, Ruy Cabello-Pasini, MD, Crystal Remelius-Herdon, William Loomis, and Wolfgang G. Junger, PhD

Mortality Rate in Pediatric Burn Patients with Inhalation Injury 135
Edgar J. Pierre, MD, Robert E. Barrow, PhD, Lucy Behrends, RRA, Meelie A. DebRoy, MD, and David N. Herndon, MD, FACS

Cerebral Vascular Response to Systemic Thermal Injury 137
Constance M. Barone, MD, FAAP, FACS, David F. Jimenez, MD, FAAP, FACS, and Virginia H. Huxley, PhD

Posttraumatic Hypercoagulability: The Role That Protein C and Tissue Factor Pathway Inhibitor Have in Its Pathogenesis 139
John T. Owings, MD, FACS, Robert Gosselin, MT, Felix D. Battistella, MD, FACS, and Margaret Bagley, RN

Intraoperative Use of Salvaged Red Blood Cells Results in Consumptive Coagulopathy 142
Keith S. Campbell, MD, David C. Cassada, MD, Mitchell H. Goldman, MD, FACS, and Daniel L. Diamond, MD, FACS

Effects of Hyperventilation and Hypoventilation on $PaCO_2$ and Intracranial Pressure During Acute Elevations of Intraabdominal Pressure with CO_2 Pneumoperitoneum 144
Raul J. Rosenthal, MD, Richard L. Friedman, MD, Mohammed A. Khan, MD, Arul Chidambaram, MD, Joseph Martz, MD, Qiuhu Shi, MS, and Moses Nussbaum, MD, FACS

Isoflurane Confers Poor Tolerance to Septic Challenge via Significant Cardiac Influences 148
Gary M. Jacobson, MD, Richard L. Ripper, CVT, H. Kenith Fang, MD, Laurence J. Segil, MD, and William R. Law, PhD

Can the Clearance of Phenylalanine Be Enhanced Using an Albumin Dialysate Hemodiafiltration System?..... 151
Samir S. Awad, MD, Preston B. Rich, MD, Srinivas Kolla, MD, Craig A. Reickert, MD, and Robert H. Bartlett, MD, FACS

Transbronchial Insertion and Lung Perforation by Feeding Tubes..... 153
Kangxiong Liao, MD, Jose Ramirez, MD, Shawn Khoda, BS, Peter Patetsios, MD, Gerald W. Shaftan, MD, FACS, and Jose Marti, MD, FACS

Chapter VI—Alimentary Tract

Glycocholic and Taurocholic Acids Stimulate Esophageal Mucosal Repair..... 156
Cynthia Nelms, MD, Carlos Alvarez, MD, Eric Strauch, MD, Kathy Lally, MS, and Barbara Bass, MD, FACS

Ischemic Conditioning (Delay Phenomenon) Improves Esophagogastric Anastomotic Wound Healing in the Rat 158
John D. Urschel, MD, FRCSEd, FRCSC, Joseph G. Antkowiak, MD, FACS, Mark D. DeLacure, MD, and Hiroshi Takita, MD, FACS

Compensatory Increases in Nitric Oxide Formation Attenuate Endothelin-1- and Epinephrine-Induced Gastric Vasoconstriction 160
A. James Beyer III, MD, Qiang Zhang, MD, John G. Wood, PhD, and Laurence Y. Cheung, MD, FACS

Effects of Endotoxin on Regulation of Intestinal Smooth Muscle Nitric Oxide Synthase and Intestinal Transit 162
Joseph J. Cullen, MD, FACS, David Mercer, MD, FACS, Adnan Qalbani, BS, Marilyn Hinkhouse, BS, and Kimberly S. Ephgrave, MD, FACS

Endogenous PAF Contributes to Sepsis-Induced Hypotension and Leukocyte Adhesion in the Gastrointestinal Tract 164
Yi-Ming Shyr, MD, A. James Beyer III, MD, John G. Wood, PhD, and Laurence Y. Cheung, MD, FACS

Disturbed Calcium Homeostasis and Injury in Human Gastric Cells Exposed to Deoxycholate: Role of Endogenous Prostaglandins.... 166
Evan R. Kokoska, MD, Gregory S. Smith, PhD, Ali Banan, PhD, and Thomas A. Miller, MD, FACS

Insulin Receptor Gene Expression in Chronic Pancreatitis: The Effect of Pancreatic Polypeptide 168
Seth A. Spector, MD, Jared C. Frattini, BS, Peter D. Zdankiewicz, MD, Jaimie D. Nathan, BS, Jin Ping Wang, MD, Dana K. Andersen, MD, FACS, and Neal E. Seymour, MD, FACS

Angiotensin II Causes Calcium Signaling in Pancreatic Exocrine Cells..... 172
Douglas C. Barnhart, MD, George A. Sarosi, Jr., MD, and Michael W. Mulholland, MD, PhD, FACS

Lysis of a Newly Established Human Pancreatic Cancer Cell Line (MPanc-96) by Autologous Tumor-Infiltrating Lymphocytes Is ICAM-1 Dependent..... 174
Matthias Peiper, MD, Peter S. Goedegebuure, PhD, and Timothy J. Eberlein, MD, FACS

Disruption of the Transforming Growth Factor Beta Signaling Pathway in Human Pancreatic Cancer Cells 176
Diane M. Simeone, MD, Amy Cascarelli, MS, and Craig D. Logsdon, PhD

Peptide YY Suppresses Serum IL-6 and TNFα Levels in Murine Necrotizing Pancreatitis 179
Kimberlee Reed, MD, and David McFadden, MD, FACS

Interleukin-1 and Tumor Necrosis Factor Cannot Initiate Colocalization or Pancreatitis in Vitro or in the Perfused Human Pancreas 181
Woody Denham, MD, Gregory Fink, MD, Jun Yang, MD, Victor Bowers, MD, Gay Carter, Kristina Ward, and James Norman, MD

Blockade of β2 and β3 Integrins Protects the Ischemic Liver from Severe Inflammatory Response 184
Juan M. Palma-Vargas, MD, Luis H. Toledo-Pereyra, MD, PhD, FICS, James M. Harkema, MD, FACS, John M. Kisala, MD, FACS, and Richard E. Dean, MD, FACS

Inducible Nitric Oxide Synthase Contributes to Liver Injury After Hepatic Ischemia and Reperfusion 185
Mark L. Johnson, MD, Laurel Omert, MD, FACS, Brian G. Harbrecht, MD, and Timothy R. Billiar, MD, FACS

Differential Activation of the p38 and ERK MAP Kinases by MHV-3 188
Ian McGilvray, MD, Ziyue Lu, MD, Alan Dackiw, MD, Gary Levy, MD, FRCS, and Ori Rotstein, MD, FRCS, FACS

Altered Kupffer Cell Function in Obstructive Jaundice Occurs Independent of Bacterial Translocation 191
Shyr-Ming Sheen-Chen, MD, FACS, Phuonglan Chau, BS, and Hobart W. Harris, MD, MPH

Roles of Macrophage Inflammatory Protein-2 and KC in Hepatic Ischemia/Reperfusion in Mice 193
Hiroyuki Yoshidome, MD, Alex B. Lentsch, PhD, Frederick N. Miller, PhD, Masaru Miyazaki, MD, and Michael J. Edwards, MD

Liver Ischemia/Reperfusion Injury in Interleukin-6-Deficient Mice 195
Jian Shou, MD, Junya Fujita, MD, Steven M. Cohen, DO, Xavier Guirao, MD, and John M. Daly, MD, FACS

Decreased Proliferative Response of Rat Splenocytes After Bile Duct Ligation Is Mediated by Increased Nitric Oxide Production 197
Mimi Leong, MD, Ting Liu, MD, Jennifer Wargo, BS, Donna M. Murasko, PhD, and Kim U. Kahng, MD, FACS

Substance P Mediates Neurogenic Inflammation in the Guinea Pig Gallbladder in Vivo 199
Jay B. Prystowsky, MD, FACS, and Robert V. Rege, MD, FACS

Plasma Membrane Ca^{2+}-ATPase (PMCA-1b) Mediates Active Ca^{2+} Transport by Gallbladder Epithelium 201
Philip A. Weber, MD, Zahidur R. Abedin, BS, Peter R. Smith, PhD, Joel J. Roslyn, MD, FACS, Mohammad Z. Abedin, PhD, and A. James Moser, MD

The Temporal Sequence of a Rapid Aldosterone Action on Cytoplasmic pH in Isolated Colonic Crypts 204
Desmond C. Winter, MB, Gerald C. O'Sullivan, MCh, FRCSI, Brian J. Harvey, PhD, DSc, and John P. Geibel, MD, DSc

CD1d Expression Is Associated with the $CD4^+$ and $\gamma\delta^+$ Intraepithelial Lymphocyte Subset in Normal Patients and Those with Crohn's Disease and Ulcerative Colitis 206
Michael J. Page, MD, Lisa S. Poritz, MD, Nate Sheaffer, BS, Amy Ten Elshof, BS, Anna Tilberg, MS, Michael J. Chorney, PhD, and Walter A. Koltun, MD, FACS

Preoperative TGF-B and TGF-B Antibodies Affect Peritoneal Adhesions and Skin Wound Healing Paradoxically 209
Amer A. Saba, MD, Vasso Godziachvili, MD, Elizabeth J. Dawe, DVM, and Yvan J. Silva, MD, FRCSC, FACS

Neurotensin Augments Glucagon-Like Peptide 2-Induced Intestinal Growth 212
David A. Litvak, MD, Nitesh A. Banker, MD, Mark R. Hellmich, PhD, B. Mark Evers, MD, FACS, and Courtney M. Townsend, Jr., MD, FACS

Developmental Expression of the Neurotensin Gene in the Fetal Colon and Stomach 214
Xiao Min Wang, MD, PhD, and B. Mark Evers, MD, FACS

Cyclin-Dependent Kinase 2 Is Required for G1/S Transition in Rat Intestinal Epithelial Cells 217
Tien C. Ko, MD, FACS, Annie Seapan, BS, Xiang Ying Xue, MD, and Courtney M. Townsend, Jr., MD, FACS

Cellular Responsiveness to Interferon-Gamma Is Acquired During Enterocyte Differentiation in Vitro: Effects on Inducible Nitric Oxide Synthase Gene Expression 219
Anna M. Chavez, MD, Melinda J. Morin, MD, Naoki Unno, MD, PhD, Mitchell P. Fink, MD, FACS, and Richard A. Hodin, MD, FACS

Burn-Induced Stimulation of Apoptosis-Related Genes in Rat Small Bowel..... 221
Sina Matin, MD, Hiroto Ikeda, MD, Yan-Shi Guo, MD, Steven E. Wolf, MD, Tien C. Ko, MD, FACS, Srinivasan Rajaraman, MD, David N. Herndon, MD, FACS, and James C. Thompson, MD, FACS

Mucosal Healing Following Ischemia/Reperfusion Injury of Rat Small Intestine: Role of Mucus and Lipid Peroxidation 224
Alexander Stojadinovic, MD, Thomas J. Miner, MD, Houman Tavaf-Motamen, MD, and Terez Shea-Donohue, PhD

Role of Luminal Neutrophils in the Gastrointestinal Mucosal Barrier to Bacteria 227
Jasleen Jasleen, MD, MSc, Beth A. McCormick, PhD, Michael J. Zinner, MD, FACS, James L. Madara, MD, and Stanley W. Ashley, MD, FACS

Crosstalk Between Intracellular Signaling Pathways: Regulation of Basolateral K^+ Channels and Intestinal Epithelial Cl^- Secretion..... 229
Edward C. Mun, MD, Patangi Rangachari, PhD, Cecilia J. Song, BA, Bruce J. Hrnjez, PhD, and Jeffrey B. Matthews, MD, FACS

Adaptation After Small-Bowel Resection Is Enhanced in Transgenic Mice with Targeted Intestinal Overexpression of EGF 231
Michael A. Helmrath, MD, Christopher R. Erwin, PhD, Cathy E. Shin, MD, and Brad W. Warner, MD, FACS

Adhesion Molecule Upregulation Leads to Phagocyte Recruitment and Impairment of Small-Bowel Motility After Surgical Manipulation 233
Jörg C. Kalff, MD, Mark K. Eskandari, MD, Christian Hierholzer, MD, Wolfgang H. Schraut, MD, FACS, Timothy R. Billiar, MD, FACS, and Anthony J. Bauer, PhD

β1 Integrin Receptor Binding May Stimulate Human Caco-2 Intestinal Epithelial Cell Proliferation and Differentiation via Intracellular Tyrosine Phosphorylation and Paxillin Translocation 235
Matthew A. Sanders, PhD, Yi-Wen Liu, PhD, and Marc D. Basson, MD, PhD, FACS

Extracellular ATP Stimulates Proliferation and Increases *cfos* mRNA Levels in Glial Cells 237
George A. Sarosi, Jr., MD, Douglas C. Barnhart, MD, and Michael W. Mulholland, MD, PhD

Chapter VII—Cardiothoracic

Myocardial Function in Hearts with Transgenic Overexpression of the G Protein-Coupled Receptor Kinase 5 240
Edward P. Chen, MD, Shahab A. Akhter, MD, J. Andrew Williamson, BA, Carmelo Gullotto, BBA, Walter J. Koch, PhD, and R. Duane Davis, MD, FACS

Vein Graft Gene Therapy Using E2F Decoy Oligonucleotides: Target Gene Inhibition in Human Veins and Long-Term Resistance to Atherosclerosis in Rabbits 242
Michael J. Mann, MD, and Victor J. Dzau, MD

Oxidative Stress Developed During Reperfusion of Ischemic Myocardium Downregulates the *bcl*-2 Gene and Induces Apoptosis and DNA Laddering 245
Nilanjana Maulik, PhD, Tetsuya Yoshida, MD, Richard M. Engleman, MD, FACS, John A. Rousou, MD, FACS, Joseph E. Flack III, MD, David Deaton, MD, FACS, and Dipak K. Das, PhD

Expression of Adenoviral Vascular Endothelial Growth Factor Increases Capillary Density and Promotes Neovascularization in a Rabbit Model of Myocardial Injury 248
Cleveland W. Lewis, Jr., MD, Keith M. Channon, MD, Brian Annex, MD, Kevin G. Peters, PhD, Donald D. Glower, MD, William E. Kraus, MD, and Doris A. Taylor, PhD

Nonviral Gene Transfer to Enhance Transmyocardial Laser Revascularization 251
Umer Sayeed-Shah, MD, Michael J. Mann, MD, Lunan Zhang, MD, Victor J. Dzau, MD, and Lawrence H. Cohn, MD, FACS

Heparin and Nonanticoagulant Heparin Increase Nitric Oxide Levels in the Coronary Circulation After Brief Ischemia/Reperfusion Injury 254
Peter C. Kouretas, MD, Young D. Kim, MD, Adam K. Myers, PhD, Paul A. Cahill, PhD, Yi-Ning Wang, MD, Lam N. To, BSc, Jeff L. Myers, MD, PhD, James V. Sitzmann, MD, Robert B. Wallace, MD, and Robert L. Hannan, MD

Aprotinin Directly Attenuates the Platelet Adhesion Defect Induced by Cardiopulmonary Bypass 256
John F. Bradfield, DVM, ACLAM, Arthur P. Bode, PhD, Robert M. Lust, PhD, and W. Randolph Chitwood, Jr., MD, FACS

Active Site-Blocked Factor IXa (IXai): A Novel Selective Anticoagulant for Use in Cardiopulmonary Bypass 259
Talia B. Spanier, MD, Mehmet C. Oz, MD, Oktavijan P. Minanov, MD, David M. Stern, MD, Eric A. Rose, MD, and Ann Marie Schmidt, MD

Ischemia/Reperfusion Injury Increases Transcription Factor NF-κB in Pulmonary Cells and Is Downregulated by a Lactone Antiinflammatory Compound 262
Steven M. Cohen, DO, Faizi Siddiqi, MD, Jian Shou, MD, Robert J. Hariri, MD, PhD, and Philip S. Barie, MD, FCCM, FACS

A Recombinant Soluble Chimeric Complement Inhibitor CAB-2.0 Prolongs Xenograft Survival in a Heterotopic Model of Pig-to-Primate Cardiac Transplantation 265
Christopher T. Salerno, MD, Agustin P. Dalmasso, MD, Timothy J. Kroshus, MD, Charles A. Svendsen, MD, David M. Kulick, MD, Soon J. Park, MD, Sara J. Shumway, MD, Manuel Guzman, MD, C. Grace Yeh, PhD, Paul J. Higgins, PhD, Abla A. Kreasey, PhD, and R. Morton Bolman III, MD

Donor Pretreatment with Adenosine A_1 Receptor Agonist Enhances Long-Term Cardiac Preservation 267
Hazem Y. Afifi, MD, ChangXi Zhang, MD, George L. Hicks, MD, FACS, William H. Risher, MD, and Tingchung Wang, PhD

Biomechanical Study Comparing Rigid Titanium Plates to Stainless-Steel Wires in Median Sternotomy Closures 270
Steven R. Buchman, MD, Wayne Ozaki, MD, DDS, and Mark Iannettoni, MD

Is the Radial Artery a Preferred Conduit for Coronary Artery Bypass? 273
David A. Bull, MD, Bruce B. Reid, MD, Aida Albanil, BA, James C. Stringham, MD, and S. V. Karwande, MD, FACS

Effect of Inotropic State on the Size of the Mitral Valve Annulus 275
Joseph H. Gorman III, MD, Robert C. Gorman, MD, Benjamin M. Jackson, MS, Scott T. Kelley, MD, Ramin Malekan, MD, and L. H. Edmunds, Jr., MD, FACS

"Bow-Tie" Mitral Valve Repair Successfully Addresses Subvalvular Dysfunction in Ischemic Mitral Regurgitation 279
Juan Umana, MD, Joseph DeRose, MD, Asim Choudhri, MD, John Madigan, MD, Talia Spanier, MD, Tamanna Nahar, MD, Dennis Mihalatos, MD, Shunichi Homma, MD, Alan Lotvin, MD, Mark Dickstein, MD, Benjamin Sun, MD, and Mehmet Oz, MD, FACS

Partial Left Ventriculectomy Improves Cardiac Hemodynamics in Experimental Dilated Cardiomyopathy 281
Stephen Ferzoco, MD, Ross Reul, MD, Rashid Ahmad, MD, Rita Laurence, BS, Umer Sayeed-Shah, MD, Thierry Mesana, MD, PhD, John Karamichalis, MD, Gregory Couper, MD, FACS, and Lawrence Cohn, MD, FACS

Partial Left Ventriculectomy Alters Regional Left Ventricular Geometry and Wall Stress..... 283
Marc R. Moon, MD, G. Randall Green, MD, George T. Daughters, MS, Neil B. Ingels, PhD, and D. Craig Miller, MD, FACS

Long-Term Effects of Dynamic Cardiomyoplasty in a Model of Chronic Left Ventricular Dysfunction..... 286
Himanshu J. Patel, MD, James J. Pilla, PhD, David J. Polidori, MD, Theodore Plappert, CVT, Martin G. St. John Sutton, FRCP, Edward B. Lankford, MD, PhD, and Michael A. Acker, MD, FACS

Role of Gq-Mediated Signaling Pathways in Ventricular Hypertrophy 289
Shahab A. Akhter, MD, Howard A. Rockman, MD, Robert J. Lefkowitz, MD, and Walter J. Koch, PhD

Quantitative Dobutamine Left Ventricular Strain Analysis: Magnetic Resonance Imaging with Myocardial Tissue Tagging.... 291
Felix F. Ungacta, MD, Pavlos Moustakidis, MD, Brian P. Cupps, PhD, Michael J. Moulton, MD, Barna A. Szabo, PhD, and Michael K. Pasque, MD

Retrograde Perfusion Following Particulate Embolization to the Brain 293
Tatu Juvonen, MD, PhD, Donald J. Weisz, PhD, David Wolfe, MD, Ning Zhang, MD, Carol A. Bodian, DrPH, Jock N. McCullough, MD, Graig K. Mezrow, MD, and Randall B. Griepp, MD

Quantitative Analysis of Intracerebral Excitatory Amino Acids and Citrulline Following Hypothermic Circulatory Arrest 297
Elaine E. Tseng, MD, Malcolm V. Brock, MD, Christopher C. Kwon, MS, Jorge D. Salazar, MD, John R. Doty, MD, Charles J. Lowenstein, MD, Michael V. Johnston, MD, and William A. Baumgartner, MD

Right Ventricular Function After Brain Death: Adaptation to Increased Afterload 300
Gábor Szabó, MD, Christian Sebening, MD, Christian Hagl, MD, Ursula Tochtermann, MD, and Siegfried Hagl, MD

Depressed Myocardial Function After Isolated Pulmonary Contusion..... 303
Charles B. Moomey, Jr., MD, Martin A. Croce, MD, FACS, Sherry M. Melton, MD, Timothy C. Fabian, MD, FACS, and Kenneth G. Proctor, PhD

Role of P-Selectin in Rat Lung Ischemia/Reperfusion Injury..... 306
Michael J. Eppinger, MD, Roscoe L. Warner, PhD, G. Michael Deeb, MD, FACS, Steven F. Bolling, MD, FACS, and Peter A. Ward, MD

Antiprotease Treatment Prevents Postperfusion Acute Respiratory Distress 309
Charles Lutz, MD, Anthony Picone, MD, PhD, FACS, Christine Finck, MD, Bruce Searles, Andrew Paskanik, Michael Hodell, Carlos Lopez, MD, and Louis Gatto, PhD

Syngeneic Mouse Tumor Model for the Study of Replication–Restricted Herpes Simplex Virus-Mediated Cancer Gene Therapy 311
Michael Y. Chang, MD, Eugene H. Kang, BA, Kathy Molnar-Kimber, PhD, Steven M. Albelda, MD, and Larry R. Kaiser, MD, FACS

Cell-Cycle Regulation of Human Non–Small-Cell Lung Carcinoma Growth Is Mediated Through Functional Interleukin-4 Receptors and the Interleukin-2 Receptor Common Gamma Chain (IL-2Rγc) 313
Richard Essner, MD, Tung Nguyen, BS, Mark C. Kelley, MD, Donald L. Morton, MD, FACS, and Dave S. B. Hoon, PhD

Tumor Suppressor Gene Therapy Strategies for Treatment of Malignant Mesothelioma 316
Nabil P. Rizk, MD, Kunjlata Amin, PhD, Wafik El Deiry, MD, PhD, Steven M. Albelda, MD, and Larry R. Kaiser, MD, FACS

Successful Retrieval and Function of Lungs from Non–Heart-Beating Donors 317
Jin-Qiang Kuang, MD, Allan Lee, MSc, Adel Giaid, PhD, and Hani Shennib, MD, FACS

Ex Vivo Gene Transfer to Lung Isografts Using Cationic Lipids 319
Bassem N. Mora, MD, Carlos H. R. Boasquevisque, MD, Matthew Bernstein, BS, Ronald Scheule, PhD, Joel D. Cooper, MD, FRCSC, FACS, Mitchell Botney, MD, and G. Alexander Patterson, MD, FRCSC, FACS

Effect of 6-Hour Preservation on Substrate Utilization in an Isolated Lung Preparation: A ^{13}C Magnetic Resonance Spectroscopy Study 322
M. Peter Tauriainen, MD, FRCSC, Michael E. Jessen, MD, FRCSC, FACS, Craig R. Malloy, MD, Robert Y. Chao, MD, Mark K. Reed, MD, and Dan M. Meyer, MD, FACS

Effect of Complement Inhibition on Posttransplant Lung Function 324
Andrew F. Pierre, MD, Alexandre M. Xavier, MD, Mingyao Liu, MD, Henry C. Marsh, PhD, Arthur S. Slutsky, MD, FRCPC, and Shaf H. Keshavjee, MD, MSc, FRCSC

Efficacy of Administering an Endothelin Receptor Antagonist (SB-209670) in Ameliorating Ischemia/Reperfusion Injury in Lung Allografts 326
Allan Lee, MSc, Jin-Qiang Kuang, MD, Adel Giaid, PhD, and Hani Shennib, MD, FACS

Human Lung Cancer to Mouse Xenotransplants to Enable Definition of Lung Cancer Antigens 329
Royce F. Calhoun II, MD, Fernando Enriquez, PhD, Sudhir Sundaresan, MD, G. Alexander Patterson, MD, FACS, Joel D. Cooper, MD, FACS, and T. Mohanakumar, PhD

Magnesium Cardioplegia Preserves β-Adrenergic Regulation and Limits Intracellular Calcium Influx in the Coronary Microcirculation 331
Motohisa Tofukuji, MD, PhD, Chantal Dessy, PhD, Mukesh D. Hariawala, MD, Kathleen G. Morgan, PhD, and Frank W. Sellke, MD, FACS

In Vivo Pulmonary Adenovirus-Mediated Gene Transfer of Nitric Oxide Synthase Increases Nitric Oxide Production 333
Alan P. Kypson, MD, Casey W. Daggett, MD, Keith M. Channon, MD, Carmelo Gullotto, BBA, Samuel E. George, MD, and Walter J. Koch, PhD

The α and β Isoforms of Protein Kinase C Mediate the Human Myocardial Contractile Response to Exogenous Calcium 335
Brian S. Cain, MD, Daniel R. Meldrum, MD, Joseph C. Cleveland, Jr., MD, Xianzhong Meng, MD, Anirban Banerjee, PhD, and Alden H. Harken, MD, FACS

Mitochondrial DNA Deletions in the Aging Myocardium: Effects of Global Ischemia/Reperfusion and Cardioplegia 337
Jari Laurikka, MD, PhD, James D. McCully, PhD, and Sidney Levitsky, MD, FACS

Adenosine A_1 Receptor Activation Attenuates Protein Kinase C-Mediated Negative Inotropic Effects in Ventricular Myocardium.... 340
Prakash Narayan, PhD, Robert D. Lasley, PhD, and Robert M. Mentzer, Jr., MD

Downstream Defects in β-Adrenergic Signaling and Relation to Myocyte Contractility Following Cardioplegic Arrest 342
Ward V. Houck, MD, Chadwick V. Thomas, BS, Melissa A. Doscher, BS, Ying Hua Wang, BS, Latha Hebbar, MD, Jignesh D. Joshi, BS, Fred A. Crawford, Jr., MD, FACS, and Francis G. Spinale, MD, PhD

Effect of Cardioplegia on Human Myocyte Volume Regulation ... 344
Robert F. Shaffer, MS, Clive M. Baumgarten, PhD, and Ralph J. Damiano, Jr., MD, FACS

Beneficial Effects of Angiotensin-Converting Enzyme Inhibitors During Revascularization of Acutely Ischemic Myocardium..... 347
Charles Volpe, MD, Harold L. Lazar, MD, FACS, Yusheng Bao, MD, Samuel Rivers, BS, Joseph Vita, MD, and John F. Keaney, Jr., MD

Adenosine Bolus-Enhanced Ischemic Preconditioning: A Novel Myoprotective Methodology to Decrease Infarct Volume and Enhance Postischemic Recovery..... 348
Masahisa Uematsu, MD, James D. McCully, PhD, and Sidney Levitsky, MD, FACS

P38 Mitogen-Activated Protein Kinase Mediates Myocardial Ischemia/Reperfusion Injury: Improved Postischemic Recovery with SB-203580 351
Daniel R. Meldrum, MD, Charles A. Dinarello, MD, Joseph C. Cleveland, MD, Leland Shapiro, MD, Brett C. Sheridan, MD, and Alden H. Harken, MD, FACS

Time Course and Significance of Myocardial Tissue Acidosis During Global Ischemia and Sanguineous Reperfusion in the Isolated Rabbit Heart 353
Fuad E. Zankoul, MD, Fahad Almohaileb, MD, Frank Glavin, BS, Jennifer Marjani, BS, Nancy Healey, BS, Vladimir Birjiniuk, MD, Michael Crittenden, MD, and Shukri F. Khuri, MD, FACS

Prevention of Cell Swelling Ameliorates Postischemic Myocardial Stunning: Improved Recovery with Low Chloride St. Thomas' Solution 356
A. Mark Jayawant, MD, Edward R. Stephenson, Jr., MD, and Ralph J. Damiano, Jr., MD

Chapter VIII—Vascular

Quantitative Assessment of Human Aortic Blood Flow During Exercise 359
Benjamin J. Schalet, MS, Charles A. Taylor, PhD, E. John Harris, MD, Robert J. Herfkens, MD, and Christopher K. Zarins, MD, FACS

Functional Assessment of Arterial Fistula Vasoactive Mechanisms 362
Cornelius A. Davis III, MD, Karen Kozlowski, PhD, William H. Pearce, MD, FACS, and Lyle F. Mockros, PhD

Fluid Flow Downregulates Endothelial Production of E-Selectin, IL-8, and NF-κB in Response to Inflammatory Agonists..... 364
Larry W. Kraiss, MD, Vijayanand Modur, MD, PhD, Andrew S. Weyrich, PhD, Neal M. Alto, BS, Thomas M. McIntyre, PhD, Stephen M. Prescott, MD, and Guy A. Zimmerman, MD

Extracellular Signal–Regulated Protein Kinase 1 and 2 Activation by Hemodynamic Forces in Endothelial Cells..... 366
Masataka Ikeda, MD, Teiji Takei, MD, Ira Mills, PhD, and Bauer E. Sumpio, MD, PhD, FACS

Perfusion Culture of Porcine Carotid Artery for Study of Smooth Muscle Cell Proliferation..... 368
Changyi Chen, MD, PhD, Eric Hughes, BS, Juan Li, MD, Amro H. H. Morsy, MD, Mark J. Kulbaski, MD, and Alan B. Lumsden, MD

In Vitro Shear Stress Enhances Subsequent in Vivo Luminal Cell Retention on Endothelial-Seeded Vascular Grafts 371
Alan Dardik, MD, PhD, and Barbara J. Ballermann, MD

Toxicity of Anticardiolipin Antibody in Hemodialysis Vascular Access Failure..... 374
Kathleen G. Raman, BS, Jai Radhakrishnan, MD, Anthony Valeri, MD, Jonathan M. Chen, MD, Alan I. Benvenisty, MD, FACS, and Mark A. Hardy, MD, FACS

Dissociation of Angiotensin II–Type 1 Receptor Downregulation from Endocytosis by Receptor Mutagenesis..... 376
J. Gregory Modrall, MD, Richard R. Neubig, MD, PhD, and James C. Stanley, MD, FACS

Endothelial Function Is Impaired in Subjects at High Risk for Developing Non–Insulin-Dependent Diabetes 379
Subodh Arora, MD, A. Enrique Caballero, MD, Rola Saouaf, MD, Paula Smakowski, MS, Edward S. Horton, MD, Aristidis Veves, MD, and Frank W. LoGerfo, MD

Heat Shock Protects Rodent Kidneys from Acute Ischemia-Reperfusion Injury 381
Juan C. Garcia, MD, and George A. Perdrizet, MD, PhD

Intraarterial Administration of SIN-1 During Limb Reperfusion Decreases Peroxynitrite-Mediated Oxidant Injury in Skeletal Muscle 383
Alexandre Serra, MD, Michael M. Farooq, MD, Stephen J. Elliott, MD, Robert A. Cambria, MD, Gary R. Seabrook, MD, FACS, Jonathan B. Towne, MD, FACS, and Julie A. Freischlag, MD, FACS

Discovery of a Novel Phospholipase A_2 Isoform in Human Neutrophils 386
Barry Rubin, MD, PhD, FRCSC, John Marshall, PhD, Thomas Lindsay, MD, MSc, FRCSC, David Ford, PhD, Gregory Downey, MD, FRCSC, Stacey Shapira, BSc, Shinta Liauw, MSc, Alex Romaschin, PhD, and Paul M. Walker, MD, PhD, FRCSC

Expression of the Novel Estrogen Receptor, ERβ, in Vascular Cells and Tissues 389
Sung K. Kim, MD, Richard H. Karas, MD, PhD, Wendy E. Baur, Robert Salomon, MD, Thomas F. O'Donnell, Jr., MD, FACS, and Michael E. Mendelsohn, MD

Characterization of Cellular Density and Determination of Neointimal Extracellular Matrix Constituents in Human Lower-Extremity Vein Graft Stenoses..... 392
Andrew T. Gentile, MD, Joseph L. Mills, MD, Alex Westerband, MD, Michael A. Gooden, MD, Scott S. Berman, MD, Carl A. Boswell, PhD, Glenn C. Hunter, MD, and Stuart K. Williams, PhD

Arterial Prosthetic Grafts Stimulate Local Production of Tumor Necrosis Factor and Matrix Metalloproteases..... 395
Martin R. Back, MD, Nina Klingman, BS, Greg S. Schultz, PhD, and James M. Seeger, MD, FACS

Matrix Metalloproteinase Activation Is Associated with Extracellular Matrix Synthesis Following Arterial Injury..... 397
Karl F. Welke, MD, Wallace C. Tarry, MD, Robert J. Wagner, BS, Tamar J. Kitzmiller, BS, and Fritz R. Bech, MD

Regulation of MMP-2 Expression in Human Aortic Smooth Muscle Cells..... 399
Janet J. Grange, MD, Lisa M. Baca-Regen, MS, Jason Rehm, MD, Brian G. Halloran, MD, Hideaki Nagase, PhD, and B. Timothy Baxter, MD, FACS

Detection of Autoantibodies Against an Aortic Antigenic Protein as a Screening Test for Abdominal Aortic Aneurysm Disease..... 401
James Knoetgen III, MD, David K. W. Chew, MD, Shichao Xia, MD, and M. David Tilson, MD, FACS

The Effect of Elevated Homocysteine on Resistance Artery Function..... 403
W. Kent Williamson, MD, Marilyn J. Cipolla, PhD, Mark Nehler, MD, Lloyd Taylor, Jr., MD, FACS, and John M. Porter, MD, FACS

Type I Collagen Enhances Phosphorylation of the PDGF Receptor and Acts Synergistically to Augment PDGF-Induced Vascular Smooth Muscle Cell Proliferation 406
Hiroyuki Itoh, MD, Leila Mureebe, MD, Stephen M. Kubaska III, MD, and K. Craig Kent, MD, FACS

Regulation of Smooth Muscle Cell Differentiation and Expression of Nonmuscle Myosin by Endothelial Cells in Coculture 408
Richard J. Powell, MD, Jaya Bhargava, PhD, and Bauer E. Sumpio, MD, PhD

Local Delivery of a Novel Octyl-β-Cyclodextrin Polysulfate Reduces Intimal Thickening After Vascular Injury in Rats 411
Shawn D. Safford, MD, Zhongda Zhang, PhD, David G. Neschis, MD, Alice Kuo, MS, Paul B. Weisz, PhD, Madelieine M. Joullie, PhD, Elliot S. Barnathan, MD, and Michael A. Golden, MD

Thrombus Diminishes Endothelial-Dependent Relaxation in the Rabbit Carotid Artery 414
Shriram M. Nene, MD, Hugh A. Gelabert, MD, FACS, Wesley S. Moore, MD, FACS, and William Quinones-Baldrich, MD, FACS

Visceral Perfusion Ameliorates Primary Fibrinolysis During Supraceliac Aortic Cross-Clamping 419
Matthew J. Eagleton, MD, Karl A. Illig, MD, Patrick N. Riggs, MD, Kenneth Ouriel, MD, FACS, Charles W. Francis, MD, and Richard M. Green, MD, FACS

Adenovirus-Mediated Gene Transfer of Stromelysin-1 Enhances Invasion of Extracellular Matrix by Vascular Endothelial Cells 423
Klaus Kallenbach, MD, Harold A. Fernandez, MD, Paolo Mignatti, MD, Graziano Seghezzi, PhD, Alexios Apazidis, AB, Sundeep Patel, MD, Eugene Grossi, MD, Stephen Colvin, MD, and Aubrey Galloway, MD

Retinoic Acid Suppresses Intimal Hyperplasia and Inhibits Vessel Remodeling Following Arterial Injury 425
Joseph J. DeRose, Jr., MD, John D. Madigan, BS, Juan P. Umana, MD, Janet Prystowsky, MD, PhD, Roman Nowygrod, MD, FACS, Mehmet C. Oz, MD, and George J. Todd, MD, FACS

Lysis of an Acute Arterial Thrombus with an Adenoviral t-PA Gene Construct 427
Maan M. Kattash, MD, Jacob M. Waugh, MD, Eser Yuksel, MD, and Saleh M. Shenaq, MD

Augmentation of the L-Arginine/Nitric Oxide Pathway Decreases Early Gene Expression of Key Growth Promoters of Intimal Hyperplasia 429
Jeffery B. Dattilo, MD, Mary Peace M. Dattilo, BS, Michael Scouvart, BS, Lawrence F. Poletti, MD, Dorne R. Yager, PhD, and Raymond G. Makhoul, MD, FACS

Adenoviral iNOS Gene Transfer Activates cGMP- and p21-Dependent Antiproliferative Pathways in Vascular Smooth Muscle Cells 432
Edith Tzeng, MD, Alena Lizonova, PhD, Imre Kovesdi, PhD, Larry L. Shears II, MD, and Timothy R. Billiar, MD, FACS

Human Vein Graft Intimal Hyperplastic Lesions Exhibit Impaired Nitric Oxide Synthase Induction 434
Peter L. Faries, MD, Michael L. Marin, MD, Frank J. Veith, MD, Richard E. Parsons, MD, Luis A. Sanchez, MD, and Takao Ohki, MD

Kinase-Deleted Dominant Negative Fibroblast Growth Factor Receptor Gene Transfer Inhibits Intimal Hyperplasia After Injury in the Rat Carotid Artery 437
David G. Neschis, MD, Shawn D. Safford, MD, Abigail K. Hanna, MD, Isabelle Leconte, PhD, Judith L. Swain, MD, Jonathan C. Fox, MD, PhD, and Michael A. Golden, MD, FACS

The Role of c-fos and c-jun in a Rat Vein Graft Model of Intimal Hyperplasia 439
William D. Suggs, MD, Samir Patel, MD, Susan C. Olson, PhD, Richard A. Oeckler, BS, Frank J. Veith, MD, and Luis A. Sanchez, MD

Control of Intimal Hyperplasia by Local Modulation of NF-κB Activity in Experimental Vein Grafts 441
Tam T. T. Huynh, MD, FRCSC, Mark G. Davies, MD, PhD, FRCSI, Brian H. Annex, MD, Einar Svendsen, MD, PhD, and Per-Otto Hagen, PhD

Intimal Hyperplasia in Response to Reduction of Wall Shear Stress 444
Tej M. Singh, MD, Yong-Jie Zhuang, MD, Hirotake Masuda, MD, PhD, and Christopher K. Zarins, MD, FACS

Salvage Angiogenesis Mediated by an Adenovirus Vector Expressing Vascular Endothelial Growth Factor Protects Against Acute Arterial Occlusion: Physiologic Evidence of Benefit 447
Charles A. Mack, MD, Kurt T. Budenbender, BS, Dean Polce, BS, Eric A. Schwarz, MD, Shailen R. Patel, MD, Emily J. Cogger, BS, O. Wayne Isom, MD, FACS, Ronald G. Crystal, MD, and Todd K. Rosengart, MD, FACS

Different Mechanisms for the Autocrine Control of Angiogenesis by Fibroblast Growth Factor-2 and Vascular Endothelial Growth Factor 449
Sundeep Patel, MD, Graziano Seghezzi, PhD, Giuseppe Pintucci, PhD, Anna Gualandris, PhD, Harold Fernandez, MD, Klaus Kallenbach, MD, Eugene A. Grossi, MD, Daniel B. Rifkin, PhD, Paolo Mignatti, MD, and Aubrey C. Galloway, MD, FACS

Chapter IX—Transplantation

Rapid Neutrophilic Destruction of Fas Ligand Expressing Cell Lines in Vivo Reveals a Novel Proinflammatory Function of Fas Ligand 451
Sang-Mo Kang, MD, Andreas Hofmann, PhD, Robert O'Rourke, MD, Helen Blau, PhD, and Peter G. Stock, MD, PhD

Blockade of VLA-4-Integrin–Fibronectin Adhesive Interactions in Vivo: A Novel Approach to Prevent Chronic Rejection 453
Stephan Korom, MD, Wayne W. Hancock, MD, PhD, Ana J. Coito, PhD, and Jerzy W. Kupiec-Weglinski, MD, PhD

Trophoblast and B-Cell Heterokaryons Demonstrate Lack of MHC Class II Expression 457
Divakar Mandapati, MD, Michael A. Coady, MD, Basel Al Ramadi, PhD, Alfred L. M. Bothwell, PhD, and Graeme L. Hammond, MD

Hepatocyte Transplantation in Anhepatic Rats: Effect on Survival, Blood Chemistry, and Growth Factor Profile 459
Theodore M. Khalili, MD, Nikolaos Arkadopoulos, MD, Olivier Detry, MD, Susumu Eguchi, MD, Kyung Suk Suh, MD, Winston Hewitt, MD, Angelo Iacobellis, MD, Achilles A. Demetriou, MD, PhD, FACS, and Jacek Rozga, MD, PhD

In Utero Hepatocyte Transplantation in a Rat Model 461
George B. Mychaliska, MD, Marcus O. Muench, PhD, Matthew H. Swartz, Jacquelyn J. Maher, MD, Joseph P. Burns, BA, Craig T. Albanese, MD, and Michael R. Harrison, MD, FACS

Liver-Directed Fetal Gene Therapy Using Recombinant Adenoviral Vectors: Successful Readministration in Midgestation Sheep Fetuses 464
Edmund Y. Yang, MD, PhD, Darrell L. Cass, MD, Karl G. Sylvester, MD, Alan W. Flake, MD, James M. Wilson, MD, and N. Scott Adzick, MD

Hepatocyte Transplantation Prolongs Survival and Prevents Development of Brain Edema in Pigs with Ischemic Liver Failure 468
Nikolaos Arkadopoulos, MD, Steve Chen, MD, Theodore M. Khalili, MD, Olivier Detry, MD, Winston Hewitt, MD, Yvette Middleton, MS, Kyung Suk Suh, MD, Helene Lilja, MD, Achilles A. Demetriou, MD, PhD, FACS, and Jacek Rozga, MD, PhD

Brain Death Selectively Stimulates Expression of Renal Inflammatory Mediators and Cytokine Expression: Means of Inhibition 470
Moriatsu Takada, MD, PhD, Kari C. Nadeau, MD, PhD, Anil Chandraker, MB, Harald S. Mackenzie, MB, ChB, Gray D. Shaw, PhD, Wayne W. Hancock, MD, PhD, Mohamed H. Sayegh, MD, and Nicholas L. Tilney, MD, FRCS, FACS

Induction of Acquired Systemic Tolerance to Rat Cardiac and Islet Allografts by Intrathymic Inoculation of Synthetic MHC Class I Peptides 473
Nepal C. Chowdhury, MD, David V. Saborio, MD, Mohamed H. Sayegh, MD, Ming-Xing Jin, MD, Mark A. Hardy, MD, FACS, and Soji F. Oluwole, MD, FRCSC, FACS

Inhibition of Specific Alloreactive CTL Activity by Soluble Class I Molecules May Be Mediated Through Apoptosis 475
Michael A. Smith, MD, Arthur E. Haynes, BS, Nancy J. Poindexter, PhD, Bashoo Naziruddin, PhD, Todd K. Howard, MD, FACS, and T. Mohanakumar, PhD

CD5$^-$CD8$^+$ Lymphocytes Migrate to Cardiac Allografts in Tolerant Mice 478
Stephen G. Kimmel, MD, Lydia Mai, MSc, and Riccardo A. Superina, MD, FRCSC

Characterization of Two Unique Cell Surface Molecules on the Facilitating Cell 481
Yolonda L. Colson, MD, PhD, and Suzanne T. Ildstad, MD

β-Cyclodextrin Prevents Cardiac Allograft Vasculopathy and Improves the Function and Survival of Rat Cardiac Allografts 484
Simon D. Eiref, BA, Wei Zhang, MD, Sicco H. Popma, BS, Chi-Long Chen, MD, Ralph H. Hruban, MD, and Bruce R. Rosengard, MD

The Role of Transgenic Expression of Human Complement Regulatory Proteins in Discordant Xenotransplantation 487
Jeffrey H. Lawson, MD, PhD, Larkin J. Daniels, MD, Charles W. Hoopes, MD, Shu S. Lin, MD, Bryan C. Weidner, MD, Kenneth R. McCurry, MD, R. Duane Davis, MD, R. Randal Bollinger, MD, PhD, Robert C. Harland, MD, John Logan, PhD, Lisa E. Diamond, PhD, Michael Martin, PhD, Guerard Byrne, PhD, and Jeffrey L. Platt, MD

Prolonged Xenogeneic Skin Graft Survival with Combined Perioperative CD40 and CD28 Pathway Blockade..... 489
Eric T. Elwood, MD, Christian P. Larsen, MD, DPhil, FACS, Hong Rae Cho, MD, Shannon C. Ritchie, Carol Tucker-Burden, Peter S. Linsley, PhD, Alejandro Aruffo, PhD, Diane Hollenbaugh, PhD, and Thomas C. Pearson, MD, DPhil, FACS

Interactions Between IL-2–Activated Human Natural Killer Cells and Porcine Endothelium Involve Direct Binding to Galactose α1,3-Galactose Ligands 491
John H. Artrip, MD, Pawel A. Kwiatkowski, MD, Adam S. Morgenthau, BA, Shu-Feng Wang, MD, Oktavijan P. Minanov, MD, Robert E. Michler, MD, FACS, and Silviu Itescu, MD

Tumor Necrosis Factor Binding Protein Treatment Improves Graft-Versus-Host Disease After Small Bowel Transplantation..... 495
Lisa S. Poritz, MD, Michael J. Page, MD, Anna F. Tilberg, MS, and Walter A. Koltun, MD, FACS

Rapamycin Prevents Allograft Arteriosclerosis by Permitting the Endogenous Expression of Inducible Nitric Oxide Synthase in the Allograft..... 497
Si M. Pham, MD, Larry L. Shears, MD, and Nobushi Kawaharada, MD, PhD

Effects of Nitric Oxide Scavenging and Inhibition of NF-κB Activity on Cardiac Allograft Survival..... 500
Matthew Cooper, MD, Ken Dembny, MD, Paul Lindholm, MD, Ching-san Lai, PhD, Gail Moore, BA, Chris Johnson, MD, FACS, Mark Adams, MD, FACS, Galen Pieper, PhD, and Allan Roza, MD, FRCSC, FACS

Endogenous Inducible Nitric Oxide Synthase Expression Attenuates the Development of Allograft Arteriosclerosis..... 503
Larry L. Shears, MD, Nobushi Kawaharada, MD, Edith Tzeng, MD, Timothy R. Billiar, MD, FACS, and Si Pham, MD

Polymerase Chain Reaction to Detect Microchimerism in Experimental Heart Transplantation with Intrathymic Pretreatment: Evidence That Donor Cells Do Not Reenter the Thymus 505
G. Russell Reiss, MD, Muhammad M. Mohiuddin, MD, and Verdi J. DiSesa, MD, FACS

The Relationship Between in Situ Chimerism, Local TGF-β, and IL-2r Expression in Rat Allograft Tolerance 508
Martin D. Goodman, MD, Michael E. Tarnoff, MD, Louise F. Strande, MS, Linda Tatem, BS, Michael S. Kain, BA, Edward J. Doolin, MD, FACS, Anthony J. DelRossi, MD, FACS, and Charles W. Hewitt, PhD

Evaluation of a Mouse Model for the Study of Microchimerism and Tolerance 510
Huey B. McDaniel, MD, Richard A. Sidner, PhD, Min Yang, MS, Matthew Burton, BS, Chang S. Shao, MS, Jay A. Tischfield, PhD, Rahul M. Jindal, MD, and Amrik Sahota, PhD

Chapter X—Gynecology and Obstetrics

A Novel Method for the Presentation of an Ovarian Tumor Peptide 512
Kris Jenner, MD, Remco Spanjaard, PhD, Joel Goldberg, MD, Patricia Lee, Peter Goedegebuure, PhD, and Timothy Eberlein, MD, FACS

Ovarian Adenocarcinoma Escapes Cytotoxic T-Lymphocyte–Mediated Cell Lysis by Loss of Intracellular Adhesion Molecule-1 Expression 514
Joel Goldberg, MD, Kris Jenner, MD, Robyn Stewart, MD, Peter Goedegebuure, PhD, and Timothy Eberlein, MD, FACS

Endogenous Expression of Transforming Growth Factor (TGF)-β, TGF-β Receptors, and TGF-β Activity Modulators as a Function of Gestational Age in Fetal Rat Skin 516
Richard J. Mackool, MD, Chia Soo, MD, George Gittes, MD, Xuguang Zhang, PhD, William W. Shaw, MD, FACS, and Michael T. Longaker, MD

Increased Vascular Endothelial Growth Factor in Hypoxic Fetal Wounds 519
James S. Constant, MD, Kelli M. Bullard, MD, Thomas K. Hunt, MD, FACS, and Michael T. Longaker, MD

Real-Time Imaging of the Rapid Nongenomic Estrogen Effects on Cellular Ion Transport 522
Brian McNamara, MD, Desmond C. Winter, MB, John Cuffe, BSc, Gerald C. O'Sullivan, MCh, FRCSI, John Geibel, MD, DSc, and Brian Harvey, PhD, DSc

Estrogen Effects on Circadian and Estrus Cycle in Food Intake and Feeding Patterns 524
Madhu Varma, MD, Rebecca Evangelista, MD, Michael M. Meguid, MD, PhD, Li Han, MD, Baihan Li, MD, Jia-Ke Chai, MD, and Zhong-Jin Yang, MD

In Utero Mouse Organogenesis: Use of Ultrasound Backscatter Microscopy 527
Dorothy Chau, MD, George K. Gittes, MD, Michael T. Longaker, MD, and Daniel H. Turnbull, PhD

Chapter XI—Neurological Surgery

Upregulation of Transforming Growth Factor-β1 and Basic Fibroblast Growth Factor mRNA Correlates with Posterior Frontal Cranial Suture Fusion in the Rat 529
Daniel Most, MD, Babak Mehrara, MD, Jamie Levine, MD, Stephen A. Schendel, DDS, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Effects of Hypertonic Saline on the Production of Tumor Necrosis Factor (TNF)-α and Upregulation of TNF-α mRNA in Rat Brain After Head Injury Complicated by Hemorrhagic Shock 531
Uyen B. Chu, MD, Susie D. Huffman, BA, Gianna Scannell, MD, FACS, Frederick W. Clevenger, MD, FACS, Emran R. Imami, MD, FACS, Lyle L. Moldawer, PhD, Troy Auffenburg, BS, and Joseph J. Tepas III, MD, FACS

Effects of Hemoglobins on Heme Oxygenase-1 and Viability of Cultured Smooth Muscle Cells 534
R. Loch Macdonald, MD, PhD, FRCSC, FACS, Linda S. Marton, PhD, Andrew Kowalczuk, BA, Xiaoyu Wang, PhD, and Emily Windmeyer

Effects of Glibenclamide on Regional Cerebral Blood Flow 536
Scott C. Robertson, MD, Manali Barua, MD, Jeff S. Gerdes, MD, and Christopher M. Loftus, MD, FACS

Surgical Management of Basal Ganglia Hemorrhage in Rat: Evidence for Reduced Brain Edema with Early Hematoma Evacuation 539
Bryan E. Figueroa, BS, Richard F. Keep, PhD, A. Lorris Betz, MD, PhD, and Julian T. Hoff, MD, FACS

Functional Evaluation Following Conventional Versus Epineural Sleeve Repair 542
Cihangir Tetik, MD, Kagan Ozer, MD, Earl Browne, MD, and Maria Siemionow, MD, PhD

Nonsurgical Abdominal Decompression Reverses Intracranial Hypertension in a Model of Acute Abdominal Compartment Syndrome 544
Bob H. Saggi, MD, Harvey J. Sugerman, MD, FACS, Geoffrey L. Bloomfield, MD, Charles R. Blocher, BS, and Jason Hull, BS

Isolation of Novel Genes Associated with Craniosynostosis 546
Michael T. Longaker, MD, John B. Mulliken, MD, Henry K. Kawamoto, MD, FACS, Warwick J. Peacock, MD, and Kang Ting, DMD, DMSc

The Use of Intraoperative Mild Hypothermia Is Not Associated with Increased Hospital Stay or Craniotomy Wound Infection 548
Tanvir F. Choudhri, MD, Kristy Z. Baker, MD, Christopher J. Winfree, MD, Brian L. Hoh, BAS, Alan E. Simon, BS, Robert A. Solomon, MD, FACS, Mitchell F. Berman, MD, and E. Sander Connolly, Jr., MD

Characterization of Rat Cranial Suture–Derived Meningeal Cell Lines 551
Patrick Grueschow, BS, Babak J. Mehrara, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Detectable Levels of Apoptosis-Inducing Fas Ligand in Cerebrospinal Fluid Correlate with Severity of Head Injury 553
Marius Keel, MD, Reto Stocker, MD, Hans-Jörg Imhof, MD, Ursula Steckholzer, BS, Masato Tanaka, MD, Shigekazu Nagata, PhD, Otmar Trentz, MD, and Wolfgang Ertel, MD

Chapter XII—Orthopaedic Surgery

An in Utero Ultrasonic Study of the Developing Forelimb in the Embryonic Mouse 557
George K. Gittes, MD, Dorothy Chau, MD, Michael T. Longaker, MD, and Daniel H. Turnbull, PhD

Reduction of Bleeding Using Cryo-Based Fibrin Sealant in a Canine Anticoagulated Knee Arthroplasty Model 558
William Curtin, MD, Gwo-Jaw Wang, MD, FACS, Norman Goodman, BS, Robert Abbott, PhD, and William Spotnitz, MD, FACS

Effect of Systemic Administration of Transforming Growth Factor-β2 on Callus Area in a Rat Tibia Fracture Model 561
W. Michael Morrissey, Jr., DMD, MD, Mark D. Cipolle, MD, PhD, FACS, Michael D. Pasquale, MD, FACS, Jeffrey Cline, BS, Kathy Gottlund, MS, Neal Simon, PhD, and George A. Arangio, MD, FACS

Collagraft Bone Substitute in Upper Extremity Fractures: A Preliminary Study 563
Philip H. Scaglione, DO, MPH, and Mark T. Buchman, MD, MS

Serum Link Protein Levels Are Elevated at Early Stages of Experimental Osteoarthritis 565
Iris Yaron, MD, Pamela A. Rivers, BS, Fatemeh Saed-Nejad, BS, David S. Howell, MD, Melvin P. Rosenwasser, MD, and Anthony Ratcliffe, MD

The Role of Epineurium as a Barrier to Neuroma Formation: Experimental Study 568
Sai S. Ramasastry, MD, FRCS, MoonJohn Kim, MD, Yoko Miura, MD, and Julio Hochberg, MD, FACS

Tourniquet Ischemia and Intramuscular Oxygen Partial Pressure: A Clinical Study in Patients Undergoing Knee Arthroscopy 570
Bernd Evers, MD, Veysel Ödemis, MD, and Heinz Gerngross, MD, PhD

Adenosine A_1-Receptors Are Not Involved in Ischemic Preconditioning of Rat Skeletal Muscle 572
Karla Chaloupka, Lorenz Gürke, MD, Axel Marx, MD, Paul Martin Sutter, MD, Beate Grab, PhD, Felix Harder, MD, FACS, and Michael Heberer, MD, FACS

Long-Bone Fractures Release Bone Marrow Components That Prime Human Neutrophils 574
L. April Gago, MD, Ernest E. Moore, MD, FACS, Thomas R. Toal, Jr., MD, David A. Partrick, MD, Craig M. Davis, MD, Angela Sauaia, MD, and Christopher C. Silliman, MD, PhD

Chapter XIII—Outcomes and Quality of Life

Determinants of Failed Transfer from the Intensive Care Unit in Trauma Patients 577
Lynette Scherer, MD, Gregory Victorino, MD, Michael Rossini, MD, and David Wisner, MD

Increased Physician Awareness of Cost Affects Vascular Surgery Outcomes 579
Christopher J. Kwolek, MD, John Turbek, PhD, Chester Yavorski, MD, Eric D. Endean, MD, FACS, Thomas H. Schwarcz, MD, FACS, Richard W. Schwartz, MD, FACS, and Gordon L. Hyde, MD, FACS

Recent Trends in Inpatient Surgery: A Longitudinal Statewide Analysis 581
Toby A. Gordon, ScD, Helen M. Bowman, MS, John D. Hundt, CPA, MHS, and John L. Cameron, MD, FACS

Importance of Hospital Volume in the Surgical Management of Pancreatic Cancer 584
Julie Ann Sosa, MD, Helen M. Bowman, MS, Eric B. Bass, MD, MPH, Charles J. Yeo, MD, FACS, Keith D. Lillemoe, MD, FACS, Henry A. Pitt, MD, FACS, Toby A. Gordon, ScD, and John L. Cameron, MD, FACS

Determinants of Disability After Lower Extremity Fracture 586
Charles Mock, MD, PhD, FACS, Ellen MacKenzie, PhD, Gregory Jurkovich, MD, FACS, Andrew Burgess, MD, FACS, Brad Cushing, MD, FACS, Barbara deLateur, MD, Mark McAndrew, MD, FACS, John Morris, MD, FACS, and Marc Swiontkowski, MD, FACS

Evaluation of Maternal and Fetal Outcomes of Trauma During Pregnancy 588
Lisa D. Benton, MD, Vernon J. Henderson, MD, FACS, and Claude H. Organ, Jr., MD, FACS

Prolonged Surgical Intensive Care Unit Stay: Mortality, Cost, and Functional Outcomes 590
Pamela A. Lipsett, MD, FACS, Sandra M. Swoboda, BS, MS, Helen M. Bowman, MS, Michelle Ylitalo, BS, MS, Jennifer Dickerson, BS, Kapil Saharia, Linda Keevican, BA, Toby A. Gordon, ScD, and John L. Cameron, MD, FACS

Predicting Patient Outcome Using Preoperative Nutritional Markers 592
Brock K. King, MD, Ashley P. Blackwell, MS, Gayle Minard, MD, and Kenneth A. Kudsk, MD

10-Year Trends in Costs, Resource Utilization, and Survival Outcome in an Established Trauma Center 595
Grant E. O'Keefe, MD, MPH, FRCSC, Gregory J. Jurkovich, MD, FACS, and Ronald V. Maier, MD, FACS

Factors Predicting Hospital Length of Stay in Patients Treated by Radical Prostatectomy 597
Thomas A. Gardner, MD, James C. Boyd, MD, and Dan Theodorescu, MD, PhD

Resident Case Tracking in a Teaching Hospital Using a Flexible Uniform Database System 600
Abe DeAnda, Jr., MD, and Frederick Dirbas, MD

A Cost-Utility Analysis of the Management of Colon Injuries 602
Karen J. Brasel, MD, MPH, David C. Borgstrom, MD, FACS, and John A. Weigelt, MD, FACS

Quality of Life in Breast Cancer Patients with Lymphedema..... 605
Vic Velanovich, MD, FACS, and Wanda Szymanski, RN, BSN

Prospective Analysis of Psychosocial Outcomes in Postmastectomy Breast Reconstruction..... 607
Paul S. Cederna, MD, Edwin G. Wilkins, MD, FACS, Julie C. Lowery, PhD, Sherry Goldfarb, MPH, and Anthony Perkins, MS

Functional Outcomes in Postmastectomy Breast Reconstruction: Preliminary Results of the Michigan Breast Reconstruction Outcome Study..... 609
Edwin G. Wilkins, MD, Julie C. Lowery, PhD, William M. Kuzon, MD, PhD, and Anthony Perkins, MS

Accurate and Cost-Effective Evaluation of Breast Masses in Males..... 612
John T. Vetto, MD, FACS, Waldemar A. Schmidt, MD, PhD, Rodney F. Pommier, MD, John DiTomasso, MD, Heidi Eppich, William J. Wood, Jr., MD, FACS, and Dane Moseson, MD, FACS

Reappraisal of Excisional Techniques in the Diagnosis of Dominant Breast Masses in Women ≤ 25 Years of Age..... 614
V. Antoine Keller, MD, Eric Mansfield, MD, and Derrick J. Beech, MD

Laparoscopic Cholecystectomy: An Analysis of Outcome..... 616
David Crawford, MD, Jonathan R. Hiatt, MD, FACS, and Edward H. Phillips, MD, FACS

Outcomes of Traditional Surgical Versus Laparoscopic/Expedited Care Management in Sigmoid Diverticulitis..... 619
Katherine A. Hammerhofer, RN, BSN, Jeffrey W. Milsom, MD, FACS, and Victor W. Fazio, MD, BS, FRACS, FACS

Cost-Effectiveness and Outcomes of Therapy for Recurrent Rectal Cancer 621
Alexander R. Miller, MD, Scott B. Cantor, PhD, George E. Peoples, MD, David B. Pearlstone, MD, Steven A. Curley, MD, FACS, and John M. Skibber, MD, FACS

Quality of Life Following Radical Prostatectomy: Comparison of Retropubic and Perineal Approaches 623
Dan Theodorescu, MD, PhD, and Mikel Gray, PhD, FAAN

Transurethral Vaporization of the Prostate: An Efficacious and Durable Treatment for Benign Prostatic Hyperplasia 625
Mark D. White, MD, Ronald P. Kaufman, Jr., MD, Anurag K. Das, MD, FACS, Hugh A. G. Fisher, MD, FACS, and Bryan A. Mehlhaff, MD

Quality of Life Improvement in Patients Undergoing Complex Lower Urinary Tract Reconstruction: An Outcomes Analysis 628
Pramod P. Reddy, MD, Anurag K. Das, MD, FACS, Naresh C. Rao, DO, Sang Kim, and James Mandell, MD, FACS

Chapter XIV—Pediatric Surgery

Hypoxia Induces Activation of Human Endothelial Cells 631
Timothy G. Canty, Jr., MD, Edward M. Boyle, Jr., MD, Edward D. Verrier, MD, and Timothy H. Pohlman, MD

Endotoxemia Induces Thymocyte Apoptosis by Upregulating Inducible Nitric Oxide Synthase in the Thymus 634
Sherilyn A. Gordon, MD, Xiao Zhang, MD, Rosemary A. Hoffman, BS, and Henri R. Ford, MD, FACS

Intraluminal Nitroglycerin Greatly Reduces Intestinal Injury in a Rabbit Model of Necrotizing Enterocolitis 636
Joy L. Graf, MD, Gerald S. Lipshutz, MD, Craig T. Albanese, MD, Russell W. Jennings, MD, and Michael R. Harrison, MD, FACS

De Novo Synthesis of Cysteine in Premature Neonates 639
Tamir H. Keshen, MD, Farook Jahoor, PhD, and Tom Jaksic, MD, PhD, FRCSC, FACS

Methionine Infusion Reproduces Liver Injury of Parenteral Nutrition Cholestasis 642
R. Lawrence Moss, MD, Allan Haynes, BS, Miko Enomoto, BS, and Robert H. Glew, PhD

A Possible Mechanism for Growth Factor Enhancement of Carbohydrate Absorption Beyond Intestinal Adaptation 644
Jeff Lukish, MD, Marshall Z. Schwartz, MD, FACS, Dahong Yu, PhD, and Yoshifumi Kato, MD

In Vivo Differentiation of Intestinal Crypt Cells Transplanted on a Biodegradable Scaffold 646
Akemi L. Kawaguchi, BA, James C. Y. Dunn, MD, PhD, David Kim, Rosa S. Choi, MD, Joseph P. Vacanti, MD, FACS, and Eric W. Fonkalsrud, MD, FACS

Fetal Tracheal Occlusion Reverses High Vascular Impedance in Diaphragmatic Hernia 649
Karl G. Sylvester, MD, Juha Rasanen, MD, Yoshihiro Kitano, MD, Alan W. Flake, MD, FACS, Timothy M. Crombleholme, MD, FACS, and N. Scott Adzick, MD, FACS

Antioxidants Reverse Fetal Rat Pulmonary Hypoplasia in Vitro ... 652
Bella A. Pacheco, MD, Saleem Islam, MD, Ping-Kuang Sung, MD, Wuu-Tay Chang, MD, Thomas F. Manganaro, Patricia K. Donahoe, MD, FACS, and Jay J. Schnitzer, MD, PhD, FACS

Changes in Pulmonary Vascular Resistance in Response to Partial Liquid Ventilation 655
Meno E. Lueders, MD, Jonathan M. Weiswasser, MD, and Charles J. Stolar, MD, FACS

Increased Cell Proliferation and Decreased Apoptosis in Congenital Cystic Adenomatoid Malformation: Insights into Pathogenesis 659
Darrell L. Cass, MD, Edmund Y. Yang, MD, PhD, Kenneth W. Liechty, MD, Terri M. Quinn, MD, Timothy M. Crombleholme, MD, Alan W. Flake, MD, FACS, and N. Scott Adzick, MD, FACS

Preclinical Trial of Recombinant Human Müllerian Inhibiting Substance in the Treatment of Ovarian Cancer 662
Peter T. Masiakos, MD, David T. MacLaughlin, PhD, Jose Teixeira, PhD, Annette Chen, MD, Arlan F. Fuller, Jr., MD, Frederic I. Preffer, PhD, David M. Dombkowski, BS, and Patricia K. Donahoe, MD, FACS

Chapter XV—Plastic Surgery

Nitric Oxide Enhances Wound Collagen Deposition in Diabetic Rats 665
Maria B. Witte, MD, Frank Thornton, MB, FRCSI, Teruo Kiyama, MD, Udaya Tantry, PhD, and Adrian Barbul, MD, FACS

Transfection of the Inducible Nitric Oxide Synthase Gene Increases Reparative Wound Collagen Accumulation 667
Frank J. Thornton, MB, FRCSI, Michael R. Schäffer, MD, Maria B. Witte, MD, Lyle L. Moldawer, PhD, Cynthia L. Tannahill, PhD, and Adrian Barbul, MD, FACS

Effects of Exogenous TGF-β_2 on Human Proliferative Scar Xenografts in Nude Rats 669
Max Polo, MD, Young-Jin Kim, MD, Xue Wang, MD, PhD, Francis Ko, BS, and Martin C. Robson, MD, FACS

Chemokine Gene Expression in a Surgically Wounded Murine Model 671
Matthew B. Yoak, MD, Shivaleela Haraphanahalli, MS, Bonnie L. Beaver, MD, David A. Denning, MD, FACS, and Susan H. Jackman, PhD

Tyrosine Phosphatase Inhibition Stimulates Human Intestinal Mucosal Healing in a Caco-2 Cell Culture Model Independently of Integrin Surface Expression but in Parallel with Actin Polymerization and Tyrosine Phosphorylation 673
Marc D. Basson, MD, PhD, FACS, Zaihan Rashid, MBBS, FRCS, Nancy J. Emenaker, PhD, and Matthew A. Sanders, PhD

In Vivo Gene Transfer to the Internal Organs of Rat by Microseeding 676
Bohdan Pomahač, MD, Feng Yao, PhD, Tor Svensjö, and Elof Eriksson, MD, PhD, FACS

Ischemic Preconditioning-Induced Tissue Protection of Endangered Skin Flaps Is Mediated by Heat Shock Protein 32 678
Frank Roesken, MD, Martin Ruecker, MD, Michaela Amon, Darius Kubulus, Inge Bauer, Michael Bauer, MD, and Michael D. Menger, MD

Isolation of Rat *mda*-7, a Melanoma-Differentiation–Associated Gene, in Repair 681
Chia Soo, MD, Michael T. Longaker, MD, Charles Bertolami, DMD, DMSc, William W. Shaw, MD, FACS, and Kang Ting, DMD, DMSc

Delayed Wound Healing in Stromelysin-1 Knock-Out Mice Is Associated with Prolonged MW 29,000 Collagenase Activity 684
Kelli M. Bullard, MD, John Mudgett, PhD, Zena Werb, PhD, and Michael J. Banda, PhD

Gene Expression of Basic Fibroblast Growth Factor and Vascular Endothelial Growth Factor Is Upregulated in Proliferating Hemangiomas: A Possible Mechanism of Angiogenesis 686
James Chang, MD, Daniel Most, MD, Stephen Bresnick, MD, DDS, John Reinisch, MD, Michael T. Longaker, MD, and Andrew E. Turk, MD

Differences in MMP and TIMP Gene Expression During Wound Repair 688
Eric Howard, PhD, Chia Soo, MD, Shelly Hunter, BS, Xuguang Zhang, PhD, William W. Shaw, MD, FACS, and Michael T. Longaker, MD

Healing of Full-Thickness Porcine Wounds in Dry, Moist, and Wet Environments 691
Tor Svensjö, Bohdan Pomahač, MD, Feng Yao, PhD, and Elof Eriksson, MD, PhD, FACS

Matrix Metalloproteinase-8 Is the Predominant Collagenase During the Healing of Open Human Dermal Wounds 694
Benedict C. Nwomeh, MD, FRCS, Robert F. Diegelmann, PhD, I. Kelman Cohen, MD, FACS, and Dorne R. Yager, PhD

Increased Oxygen Tension Potentiates Angiogenesis 696
Jeffrey J. Gibson, MD, Adam P. Angeles, MD, and Thomas K. Hunt, MD, FACS

Macrophage Vascular Endothelial Growth Factor Angiogenesis Is Regulated by Mono-ADP-Ribosylation 700
John J. Feng, MD, Thomas K. Hunt, MD, FACS, Heinz Scheuenstuhl, AB, Perveen Ghani, PhD, and M. Zamirul Hussain, PhD

Wound-Healing Potential of Topically Applied Deoxyribonucleosides 702
E. Alexandria Chen, MD, Lily Zhao, MD, Michael Bamat, PhD, and Thomas Mustoe, MD, FACS

Tamoxifen Downregulates TGF-β Production by Keloid Fibroblasts 704
John S. Mancoll, MD, Dorothy Chau, MD, John Munger, MD, John Harpel, MS, Jiangang Zhao, MS, George K. Gittes, MD, Michael T. Longaker, MD, and Linda G. Phillips, MD, FACS

Differential IL-6 Production by Fetal Versus Adult Fibroblasts in Response to Platelet-Derived Growth Factor 707
Kenneth W. Liechty, MD, Timothy M. Crombleholme, MD, Karl G. Sylvester, MD, Harold N. Lovvorn, MD, Yoshihiro Kitano, MD, Darrell L. Cass, MD, and N. Scott Adzick, MD

Differential Dural Cytokine Expression Correlates with Fetal Cranial Suture Patency and Calvarial Bone Formation 710
Babak J. Mehrara, MD, Daniel Most, BS, James Chang, MD, Steven Bresnick, MD, Andrew Turk, MD, Steven Schendel, DDS, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Expression of TGF-β1 and Basic Fibroblast Growth Factor During Mandibular Distraction Osteogenesis 712
Jiahong Miao, MD, Babak J. Mehrara, MD, Norman Rowe, MD, Richard J. Mackool, MD, Patrick R. Connolly, BS, George K. Gittes, MD, and Michael T. Longaker, MD

Delay of Wound Healing by the Angiogenesis Inhibitor TNP-470 714
Harold Brem, MD, H. Paul Ehrlich, PhD, Dimitrius Tsakayannis, MD, and Judah Folkman, MD, FACS

Insulin-Like Growth Factor-I Stimulates Intestinal Epithelial Cell Proliferation and Migration 716
Kai Chen, MD, Masahiro Inoue, MD, Masafumi Wasa, MD, Tatsuo Azuma, MD, Masahiro Fukuzawa, MD, Shinkichi Kamata, MD, and Akira Okada, MD, FACS

Insulin-Like Growth Factor Binding Protein Levels Differ in Two Different Wound Models 718
David Y. Suh, MD, Kam Chan, PhD, Xian-Bin Lu, PhD, Thomas K. Hunt, MD, FACS, and E. Martin Spencer, MD, PhD

The Effect of Burn Injury and Viral Infection on Weight Loss, Viral-Specific Lymphocyte Cytotoxicity, and Serum Tumor Necrosis Factor-α 720
C. Scott Hultman, MD, John P. Hunt, MD, Hiromasa Yamamoto, MD, Soranit Siltharm, MD, Suzan deSerres, BA, Jeffrey A. Frelinger, PhD, and Anthony A. Meyer, MD, PhD, FACS

Activation of Complement Is Not Required for Increased Production of Tumor Necrosis Factor Following Burn Injury 723
Ann Lyons, FRCSI, Inna Saporoschetz, BS, Michael C. Carroll, PhD, James A. Lederer, PhD, John A. Mannick, MD, FACS, and Mary L. Rodrick, PhD

Induction and Recruitment of CD3-Negative and Gamma-Delta T Cells Following Burn Injury 725
Douglas H. L. Chin, MD, ScMM, Sean T. O'Sullivan, MD, FRCS, Eliza Lo Chin, MD, Mary Rodrick, PhD, and John A. Mannick, MD, FACS

ICAM-1 Upregulates Lipid-Mediated Superoxide Generation..... 727
Carlton C. Barnett, Jr., MD, Ernest E. Moore, MD, FACS, and David A. Partrick, MD

Prefabricated Cranial Flaps Using Fibrin-Based Tissue Engineered Cartilage 730
Vivian Ting, MD, C. Derek Sims, MD, Joseph G. McCarthy, MD, FACS, Armen K. Kasabian, MD, Daniel A. Grande, PhD, Brian K. Dublin, BA, George K. Gittes, MD, and Michael T. Longaker, MD

A Comparative Study of the Ultrastructure of Cortical Membranous and Cortical Endochondral Onlay Bone Grafts 733
Wayne Ozaki, MD, DDS, and Steven R. Buchman, MD

Eyelid Motion Analysis: An Innovative Method to Objectively Quantify Synchronous Eyelid Motion 736
Naveen N. Somia, MD, FRCS, Gregory S. Rash, EdD, Michael J. Sundine, MD, M. Douglas Gossman, MD, and John H. Barker, MD, PhD

Assessment of 3-D Computerized Wound Fractional Surface Area Calculations for Burn Size Estimation 738
Tina Tinnin, RN, MSN, Annemarie O'Connor, RN, BSN, David Tuch, William Brownlee, MD, and Raphael Lee, MD, ScD, FACS

Multicenter Prospective Randomized Clinical Trial for Thrombosis Prevention in Microvascular Free-Flap Surgery 741
Roger K. Khouri, MD, FACS, Patrick Yeramian, MD, PhD, Charles O. Benes, MA, and Jeffrey W. Sherman, MD

Comparison of the Effects of Ischemic Preconditioning and Surgical Delay on Myocutaneous Flap Survival 743
Khalique S. Zahir, MD, Syed S. Ahmed, MD, PhD, Jay Zink, and J. Grant Thomson, MD

Muscle Flap Response to Low-Dose Radiation 745
Jared Mee, MD, Maria Siemionow, MD, PhD, Stacy Porvasnik, BS, Kagan Ozer, MD, Pia Piza, and James E. Zins, MD

Alternating Muscle Stimulation: A Method to Mimic Motor Unit Recruitment to Enhance Fatigue Resistance 748
Erik D. H. Zonnevijlle, MD, Naveen N. Somia, MD, Richard W. Stremel, PhD, Claudio Maldonado, PhD, Paul M. N. Werker, MD, PhD, Moshe Kon, MD, PhD, and John H. Barker, MD, PhD

Chapter XVI—Urology/Reproductive Biology

Association of *bcl*-2 Oncoprotein Overexpression with Disease Recurrence in Patients Undergoing Radical Prostatectomy 750
David J. Cozzolino, MD, Michael R. Curtis, MD, E. Ann Gormley, MD, Alan R. Schned, MD, Richard W. Siegler, MD, Leila A. Mott, MS, and John A. Heaney, MD, FACS
X
Activation of a Novel Ser/Thr Protein Kinase in β-Lapachone-Induced Apoptosis in Prostatic Carcinoma Cell via Intracellular Ceramide Accumulation..... 754
Bo He, MD, Jerome P. Richie, MD, FACS, and Michael L. Lu, PhD

Transurethral Photodynamic Therapy for Benign Prostatic Hyperplasia: A Canine Pilot Study Using Benzoporphyrin Derivative 756
Sugandh D. Shetty, MD, FRCS, James O. Peabody, MD, Elsa Beck, DVD, PhD, Daniel S. Schultz, MD, Riad N. Farah, MD, FACS, and Joseph C. Cerny, MD, FACS

Vitamin D Inhibits Telomerase Activity and Tumor Cell Invasion in Human Prostate Cancer LNCaP Cells 758
Jaime Landman, MD, Adam M. Kotkin, Wei-Ping Shu, MS, Michael J. Droller, MD, FACS, and Brian C.-S. Liu, PhD, JD

Changes in Activity of Muscarinic Receptors in Rat Urinary Bladder Following Partial Outlet Obstruction 761
Vladimir P. Krichevsky, MD, Murali Pagala, PhD, Igor Vaydovsky, BS, and Gilbert J. Wise, MD

Renal Effects of Partial Bladder Outlet Obstruction in the Fetal Lamb 764
Theresa M. Quinn, MD, Andrew J. Kirsch, MD, Stephen A. Zderic, MD, John W. Duckett, MD, FACS, Pamela Howard, PhD, Alan W. Flake, MD, FACS, N. Scott Adzick, MD, FACS, Douglas A. Canning, MD, FACS, Howard M. Snyder, MD, FACS, and Edward J. Macarak, PhD

The Hautmann Neobladder with a Chimney: A Versatile Modification 767
Marguerite Lippert, MD, and Dan Theodorescu, MD, PhD

Hemostatic Efficacy of a Fibrin Sealant Dressing in an Animal Model of Partial Nephrectomy 770
Mark R. Jackson, MD, FACS, Majdi M. Taher, MD, J. Robert Burge, MS, Chitra Krishnamurti, PhD, Thomas J. Reid, MD, PhD, and Barbara M. Alving, MD

Testicular Blood Flow and Endothelin and Prostacyclin Release During and After Unilateral Testicular Torsion 773
Linh Bao Nguyen, MD, Gonzalo Lievano, MD, Jayant Radhakrishnan, MD, MS, FACS, Linda Carol Fornell, MT, and Eunice Gertrude John, MD

Repeated Episodes of Subcritical Ischemia Can Attenuate the Renal Injury of Critical Ischemia/Reperfusion 775
Karen Stokes, BAMod, Cathal Kelly, FRCSI, Hazem Abdih, FRCSI, David Keegan, MB, and David Bouchier-Hayes, FRCSI, FACS

Role of the Activated Neutrophil and Nitric Oxide in Ureteric Obstruction 778
David M. Bouchier-Hayes, MB, FRCSI, Leonie Young, BSc, and John M. Fitzpatrick, MCh, FRCSI

Erythromycin Directly Inhibits Contraction of Rat Urinary Bladder Smooth Muscle 780
Aviram Nissan, MD, Jian M. Zhang, MSc, Yuval Haskel, MD, Herbert R. Freund, MD, and Menachem Hanani, PhD

Chapter XVII—Surgical Oncology

Targeting p53 for Adoptive T-Cell Immunotherapy..... 783
Todd M. McCarty, MD, Xiping Liu, MD, PhD, Roderich E. Schwarz, MD, PhD, Don J. Diamond, PhD, and Joshua D. I. Ellenhorn, MD, FACS

Molecular Analysis of the Antigen Recognized by the Tumor-Specific Monoclonal Antibody RS-11 785
Hiroshi Eto, MD, PhD, Hideyuki Saya, MD, PhD, and Kenneth K. Tanabe, MD

Recognition of Breast Cancer–Associated Peptides by Tissue-Specific, HLA Class I-Restricted Allogeneic Cytotoxic T Lymphocytes..... 787
Thelinh Nguyen, MD, Bashoo Naziruddin, PhD, and T. Mohanakumar, PhD

Plasminogen Activator Inhibitor-1 Plays a Role in Thrombospondin-1 and Transforming Growth Factor-β1-Mediated Tumor Cell Invasion..... 790
Daniel Albo, MD, David H. Berger, MD, Thomas N. Wang, MD, and George P. Tuszynski, PhD

Human Neutrophils Facilitate Tumor Cell Migration: A Novel Mechanism for Metastatic Spread 792
Qiong Di Wu, BSc, Jiang Huai Wang, MD, PhD, H. Paul Redmond, MCh, FRCSI, Claire Condron, BSc, and David Bouchier-Hayes, MCh, FRCSI

Recombinant Vaccinia Viruses Are Potent Expression Vectors for Human T-Cell Costimulatory Molecules 795
Daniel Oertli, MD, Walter R. Marti, MD, Paul Zajac, PhD, Giulio C. Spagnoli, MD, Michael Heberer, MD, FACS, and Felix Harder, MD, FACS

In Vivo Gene Transfer of Granulocyte-Macrophage Colony-Stimulating Factor Recruits Epidermal Dendritic Cells and Augments Cytotoxic T-Cell Response 797
Wilbur B. Browne, MD, Lawrence W. Weber, PhD, Yoichi Moroi, MD, PhD, Siqun Wang, MD, PhD, Hannah Whitney, BS, Alan N. Houghton, MD, and Jonathan J. Lewis, MD, PhD

Induction of Tumor-Specific Cytotoxic Lymphocytes in Vitro by Nonreplicating Recombinant Vaccinia Virus Encoding Melan-A_{27-35} 799
Walter R. Marti, MD, Paul Zajac, PhD, Daniel Oertli, MD, Giulio C. Spagnoli, MD, Felix Harder, MD, FACS, and Michael Heberer, MD, FACS

A Host Antitumor Immune Response Triggered by Local Production of Interferon-Gamma Is a Common Mechanism in Adoptive Immunotherapy 802
Noriaki Sadanaga, MD, Makoto Nagoshi, MD, James A. Lederer, MS, PhD, Peter S. Goedegebuure, PhD, and Timothy J. Eberlein, MD, FACS

An in Vivo Model Demonstrating That Tumor Necrosis Factor Targets Tumor Endothelium 804
James F. Pingpank, MD, and Douglas L. Fraker, MD, FACS

Adenovirally Mediated Wild-Type p53 Gene Therapy Downregulates Vascular Endothelial Growth Factor Expression in Human Colon Cancer 806
Michael Bouvet, MD, Lee M. Ellis, MD, FACS, Wenbiao Liu, MD, Bingliang Fang, MD, and Jack A. Roth, MD, FACS

Differential Expression of p53 and p21 in Chemotherapeutic Treatment of Esophageal Squamous Cell Carcinoma in Vitro 809
David Andrew Rigberg, MD, Frances S. Kim, BS, Sora Lee, DDS, Michael A. Cole, BS, and David W. McFadden, MD, FACS

High-Level Tissue-Specific Gene Expression in Melanoma Cells with T7 RNA Polymerase Transcriptional Amplification 811
Charles K. Brown, MD, PhD, Bernard J. Park, MD, H. Richard Alexander, MD, and David L. Bartlett, MD

Chemosensitization of Colorectal Cancer Cells by Expression of the NF-κB Superrepressor IκBα 815
James C. Cusack, Jr., MD, Cun-Yu Wang, DDS, Rong Liu, MD, MS, and Albert S. Baldwin, Jr., PhD

Tumorigenesis in Multifocal Papillary Thyroid Carcinoma: Analysis by *ret*/PTC Oncogene Rearrangements 817
Sonia L. Sugg, MD, Lily Ramyar, Irving B. Rosen, MD, Jeremy L. Freeman, MD, Shereen Ezzat, MD, and Sylvia L. Asa, MD, PhD

Association of the eIF4E Gene with Malignant Transformation of the Breast 819
Donald L. Sorrells, MD, Carol Meschonat, Li Liu, Arrigo De Benedetti, PhD, and Benjamin D. Li, MD

Improved Diagnosis of Occult Melanoma in Sentinel Nodes: Reverse Transcriptase–Polymerase Chain Reaction Studies of the Tyrosinase and Mart-1 Genes 823
James S. Goydos, MD, Frank Borao, MD, Michael Gartner, DO, Anthony Yudd, MD, Edita Bancila, MD, and F. Joseph Germino, MD, PhD

Cigarette Smoking Is Associated with an Increased Incidence of Pancreatic K-ras Mutations in the Absence of Pancreatic Cancer 826
David H. Berger, MD, Hong Chang, MD, Teresa A. Lehman, PhD, Rama Modali, PhD, Clarke W. Heath, MD, and Bruce Ruggeri, PhD

c-Src Kinase Activity Is Elevated in Human Gastric Cancer 828
Nitesh A. Banker, MD, B. Mark Evers, MD, FACS, Hong Jin Kim, MD, Mark R. Hellmich, PhD, and Courtney M. Townsend, Jr., MD, FACS

Transforming Growth Factor-β-Mediated Growth Inhibition of Human Pancreatic Cancer Requires a Functional *DPC4* Tumor Suppressor Gene 831
Ana M. Grau, MD, Ling Zhang, MD, Weixin Wang, PhD, Douglas Evans, MD, FACS, James Abbruzzese, MD, and Paul Chiao, PhD

Importance of Histone Hyperacetylation and the p21 Gene in Butyrate-Induced Growth Arrest of Colon Carcinoma Cells 833
Sonia Archer, MD, Shufen Meng, MD, Amy Shei, and Richard A. Hodin, MD, FACS

Autocrine Regulation of Blood Vessel Formation by Fibroblast Growth Factor-2 and Vascular Endothelial Growth Factor: A Mechanism for Tumor Angiogenesis 836
Graziano Seghezzi, PhD, Sundeep Patel, MD, Christine J. Ren, MD, Giuseppe Pintucci, PhD, Harold Fernandez, MD, Klaus Kallenbach, MD, Richard L. Shapiro, MD, Steven B. Colvin, MD, Daniel B. Rifkin, PhD, Paolo Mignatti, MD, and Aubrey C. Galloway, MD

An E1B-Attenuated Adenovirus Selectively Inhibits Growth of a p53-Deficient Hepatocellular Carcinoma 838
Charles M. Vollmer, Jr., MD, Lisa H. Butterfield, PhD, Antoni Ribas, MD, Syed Jilani, MD, John Glaspy, MD, William H. McBride, PhD, and James S. Economou, MD, PhD, FACS

A Novel G Protein-Coupled Receptor Isolated from an Estrogen Receptor-Positive Breast Carcinoma cDNA Library 841
Charles Carmeci, MD, Devon A. Thompson, PhD, Huijun Z. Ring, PhD, Uta Francke, MD, and Ronald J. Weigel, MD, PhD

The Human Prostate Cancer, LNCaP, Produces an Angiogenesis Inhibitor That Maintains Tumors in an Indolent State 843
Philip A. Linden, MD, and Judah Folkman, MD, FACS

Proposal of a New Biological Staging Model in Gastric Cancer Considering Biological Grading and Minimal Residual Tumor Disease 845
M. Markus Heiss, MD, Heike Allgayer, MD, Rudolf Babic, MD, Klaus U. Gruetzner, MD, and Friedrich W. Schildberg, MD

Hypoxia-Inducible Factor-1 Gene Expression in Primary and Metastatic Colorectal Cancer: A Potential Role in the Regulation of Tumor Angiogenesis 849
Hui Yuan, MD, Mary Matli, BS, and Robert S. Warren, MD

HER2/neu-Specific Antisense Oligonucleotides Inhibit the Growth of Human Pancreatic Carcinoma Cells That Overexpress the HER2/neu Oncogene 852
Haeri Roh, PhD, James Pippen, BA, and Jeffrey A. Drebin, MD, PhD

Adenovirus-Targeted Delivery of a Suicide Gene to the Liver: An Antineoplastic Strategy 856
Denis Evoy, FRCSI, Edward A. Hirschowitz, MD, Hassan Naama, FRCSI, John Goncalves, MD, Ronald G. Crystal, MD, John M. Daly, MD, FACS, and Michael D. Lieberman, MD

Inhibition of Tumor Implantation at Trocar Wound Sites..... 858
Justin S. Wu, MD, Suzanne M. Pfister, MS, Tom L. Buetnner, MS, Andy M. Fair, BS, Martha B. Ruiz, BA, Judith M. Connett, PhD, Gordon W. Philpott, MD, and James W. Fleshman, MD

Occult Breast Cancer Micrometastases: Detection in Axillary Lymph Nodes Using a Multimarker Reverse Transcriptase–Polymerase Chain Reaction Panel..... 861
Mark A. Lockett, MD, Paul L. Baron, MD, Paul H. O'Brien, MD, Bruce M. Elliott, MD, Jacob G. Robison, MD, John S. Metcalf, MD, and David J. Cole, MD

Antioxidants Vitamin E and Pyrrolidinedithiocarbamate Enhance 5-Fluorouracil Cytotoxicity in Vivo 863
Mark O. Peeler, MD, ScM, Rebecca Chinery, PhD, Jeffrey A. Brockman, PhD, Robert J. Coffey, MD, and R. Daniel Beauchamp, MD, FACS

Fibrin Sealant Reduces the Amount and Duration of Fluid Drainage After Axillary Lymphadenectomy..... 866
Marcia Moore, MD, William E. Burak, Jr., MD, Edward Nelson, MD, Thomas Kearney, MD, Rache Simmons, MD, Scott Buchanan, MD, and William Spotnitz, MD, FACS

Nonsteroidal Antiinflammatory Drugs Suppress Endonuclease Expression in Sporadic Colorectal Cancer 868
Morton S. Kahlenberg, MD, Carmine Volpe, MD, FACS, Daniel Stoler, PhD, Nicholas J. Petrelli, MD, FACS, and Garth Anderson, PhD
